Daisy CAN Wiring Layout

Satellite Navigation control is via the infrared receiver above the colour screen. It is wired directly to the Sat Nav module and does not have any interface to the audio module. The video signal also goes directly to the colour screen. When the Sat Nav module display is switched on, a video select line is grounded between the Sat Nav Module and the Screen module. This then runs the Sat Nav Video as the back ground display on the screen and the ICC function become pop up overlays.

The Cabin Temperature Sensor and remote key receiver antenna are also directly wired to the BEM and have no connection to the Audio Module.

If the ICC is replaced, the CTS calibration factor needs to be retaught to the BEM (refer to section 419-10). The ICC/Audio Security Module Reconfiguration will be required. WDS must be used for this operation.
