Payne,2013-05-07 What is the answer to inspiring sustainable behaviour It starts with a question or nineteen With this simple and inspiring guide you ll learn how to ask for persistent pervasive and near costless change by uncovering our hidden quirks judgmental biases and apparent irrationalities The only change you ll need to make is how you ask Businesses larger or small will soon have to cut costs and cut carbon irrespective of the products they sell or the services they perform National government has structural policy and legislative needs and local government has implementation and documentation needs Indeed the new UK government coalition s approach to transport is simply cut costs and cut carbon Set against this there is an increasing sense that popular culture and popular science are congregating around a desire to understand who we are and how we behave The recent rise of behavioural economics is a testament to this as well as the relevance of environmental psychology Allied to this is a sense that big business is forging ahead with plans to account for and mitigate carbon emissions without the marketing and communications departments being able to help or communicate this effectively either through their own efforts or those of their communication agencies The 19 Different Ways to Ask for Change offer a solution to all these needs by pulling them together and showing that changing how we ask is near costless but its effects could be near priceless This book shows that simplification isn t always the solution an action can be the most successful question and a default answer can be the most important It explores why short term memory tasks change our behaviour how singing roads regulate speed and that commitment gaps change outcomes how our worry profile is the same as an Argentinean farmer s why knowledge of what kills you is irrelevant but asking about behaviour that kills is deadly and what a chimpanzee s tea party tells us about the effect of ownership on decision making This timely book will be of great value to scholars and practitioners whose work relates to reducing carbon emissions with a particular emphasis on environmental psychology behavioural economics project design and psychology It offers practical solutions for policy makers and professionals in marketing and communications departments **360 Degrees of Success** Ana Weber,2014-01-01 360 Degrees of Success is furnishing simple effective and user friendly tools you can tailor into your personal professional business life and create your

success at any age or time **How Statesmen Think** Robert Jervis, 2017-02-14 Robert Jervis has been a pioneering leader in the study of the psychology of international politics for more than four decades. *How Statesmen Think* presents his most important ideas on the subject from across his career. This collection of revised and updated essays applies, elaborates, and modifies his pathbreaking work. The result is an indispensable book for students and scholars of international relations. *How Statesmen Think* demonstrates that expectations and political and psychological needs are the major drivers of perceptions in international politics as well as in other arenas. Drawing on the increasing attention psychology is paying to emotions, the book discusses how emotional needs help structure beliefs. It also shows how decision makers use multiple shortcuts to seek and process information when making foreign policy and national security judgments. For example, the desire to conserve cognitive resources can cause decision makers to look at misleading indicators of military strength, and psychological pressures can lead them to run particularly high risks. The book also looks at how deterrent threats and counterpart promises often fail because they are misperceived. *How Statesmen Think* examines how these processes play out in many situations that arise in foreign and security policy, including the threat of inadvertent war, the development of domino beliefs, the formation and role of national identities, and conflicts between intelligence organizations and policymakers.
