*Social Justice, Poverty and Race*, 2011-01-01 A clear understanding of social justice requires complex rather than simple answers It requires comfort with ambiguity rather than absolute answers This is counter to viewing right versus wrong just vs unjust or good vs evil as dichotomies This book provides many examples of where and how to begin to view these as continuums rather than dichotomies

*New Perspectives on Pragmatism and Analytic Philosophy*. Rosa M. Calcaterra, 2011-04 The strong influence of pragmatism in the early 20th century international debate its subsequent and apparently inexorable decline and its recent revival are intertwined with the fate of other currents of thought that have marked the development of contemporary philosophy This volume clarifies the most recent events of this development focusing on key theoretical issues common both to American classic philosophical tradition and analytical thought Many essays in this volume belong to what we can call new pragmatism namely a pragmatist perspective that is different from the

postmodernist neo pragmatism la Rorty The volume shows that both pragmatists and analytic thinkers stress the importance of logic and scientific method in order to deal with philosophical problems and seek for a clarification of the relation between our ethical values and our understanding of natural facts Moreover the anti skeptic attitude that characterizes pragmatism as well as most part of analytic philosophy and their common attention to the problems of language and communication are emphasized The more sophisticated tools for addressing both theoretical and methodological problems developed by analytic philosophy are pointed out and the essays show the possible integration of these two forms of speculation that for too a long time mutually disregarded one another

**Dialogue on Grief and Consolation** Terence Lawlor O'Connell,2009 Have you lost a loved one The loss can be inestimable the grief excruciating What helped you Did someone say something comforting Did someone offer a consolation which you resented Have you ever tried to comfort someone with a terminal illness or one who has lost a loved one Knowing how to help or what to say that is not trite insincere or superficial can be difficult The point of view of a grieving person is quite different from that of those who wish to offer comfort In a multicultural society such as ours anticipating the beliefs of the grieving person can be even more difficult This book explores the perspective of a grieving person It considers the merits and potential harm of alternative comfort strategies As a philosophical analysis of grief it emphasizes an understanding of the beliefs that underlie grief and the usefulness or dangers of emotions Because grief is so complex and sensitive a narrow approach runs the risk of alienating the grieving person The ideas in this book are expressed in a dialogue among three characters Their discussion is broad and fundamental Starting from the familiar consolation She is no longer suffering and the grieving person's resentment toward the expression the three friends articulate the value of life and the evils of death Their discussion enriches their understanding of grief Many consolations offered to mourners are poor arguments Even the better ones do their work best in the context of a greater understanding of grief

Postethnophilosophy Sanya Osha,2011-04 This book makes a bold announcement for the beginning of a postethnophilosophical phase in modern African thought It re considers the question What is African philosophy and introduces a strategy for setting a broad and productive agenda for contemporary African philosophical thought

woman scientist battling the old boy s network during the 1960s and 1970s Neena Schwartz a prominent  
neuroendocrinologist at Northwestern University tells all She became a successful scientist and administrator at a time when  
few women entered science and fewer succeeded in establishing independent laboratories She describes her personal career  
struggles and those of others in academia as well as the events which lead to the formation of the Association of Women in  
Science and Women in Endocrinology two national organizations which have been successful in increasing the numbers of  
women scientists and their influence in their fields The book intersperses this socio political story with an account of  
Schwartz s personal life as a lesbian and a description of her research on the role of hormones in regulating reproductive  
cycles In a chapter titled Don t Ask Don t Tell she examines the evidence from a scientist s point of view for the hormonal and  
genetic theories for homosexuality Other chapters provide advice on mentoring young scientists and a discourse on why it  
matters to all of us to have more women doing and teaching science She also describes the process of putting together an  
interdisciplinary Center on Reproductive Science at Northwestern which brought together basic and clinical scientists in an  
internationally recognized program of research and practice      **Reconstructing Subjects** Hakam H. Al-Shawi, 2011

*Cutting Through the Surface*, 2009-01-01 This book examines the role of philosophy and philosophers in bioethics Academics often see bioethical studies as too practical while decision makers tend to see them as too theoretical The purpose of this collection of new essays by an international group of distinguished scholars is to explore the troubled relationship between theory and practice in the ethical assessment of medicine health care and new medical and genetic technologies The book is divided into six parts In the first part philosophers consider the definition of bioethics the nature of applied ethics more generally and the possibility of combining utilitarian and liberal strands of thinking in moral and political studies In the second part authors discuss the place and justification of principles in bioethics and the significance of medical and nursing experience in moral decision making The third part addresses the complementary or contradictory as the case may be principles of dignity autonomy precaution and solidarity and their use in theoretical and practical settings In the fourth part public health measures and experimental research are defended against traditional moral concerns Part five scrutinizes parental responsibilities in bearing and rearing children especially the reasons for and against human reproduction in individual cases In part six enhancements to human nature by various means are analyzed Following in the footsteps of four previous collections in the Values in Bioethics special series by the same editorial team *Scratching the Surface of Bioethics* *Bioethics and Social Reality* *Ethics in Biomedical Research and Arguments and Analysis in Bioethics* this book compiled in honor of Professor Matti Häyry's 50th birthday drills into the core of the discipline to show the philosophical depths that lie under the polished surface of policy driven everyday bioethics

Values and Powers Krzysztof Piotr Skowroński, 2009-01-01 This book shows how much and in what sense values are related to powers and powers are related to values in American pragmatism The proposed re reading of American pragmatism will facilitate a novel understanding of it as a philosophical movement and by showing its truly humanistic democratic and pro social character the stronger impetus for current rethinking of values is being provided

*The Philosophy of Viagra*, 2011-01-01 The impotency remedy Viagra is the fastest selling drug in history It has grown beyond being simply a medical phenomenon but has achieved the status of cultural icon appearing on television as a pretext for jokes or even as a murder weapon Viagra has socio cultural implications that are not limited to sexuality The Philosophy of Viagra offers a unique perspective as it examines the phenomenon of Viagra through ideas derived from more than two thousand years of philosophical reasoning In philosophy Eros has always had a central position Since Plato philosophy has held that desire is not only a medical but also a spiritual phenomenon and that scientific explanations claiming to give an exhaustive account of erotic perception are misleading Philosophical ideas are able to debunk various scientific rationalizations of sexuality one of

which is the clinical sexological discourse on Viagra In this volume several authors interpret Viagra through the lens of classical philosophy explicating the themes of immortality and hedonism Others offer psychoanalytical considerations by confronting clinical sexology with psychological realities Still others evoke intercultural aspects revealing the relative character of potency that the phenomenon of Viagra attempts to gloss over

**Reburial of Nonexistents** Carolyn Swanson, 2011-06 Alexius Meinong claimed to uncover a brave new world of nonexistent objects He contended that unreal objects such as the golden mountain and the round square genuinely had properties such as nonexistence itself and therefore deserved a place in an all inclusive science Meinong's notion of nonexistents was initially not well received largely due to the influence and criticisms of Bertrand Russell However it has gained considerable popularity in more recent years as academics have uncovered shortfalls in Russell's philosophy and strived to explain apparent facts about the beingless Some philosophers have continued Meinong's project further explaining nonexistent objects or formulating logic systems that incorporate them The more recent developments beg for a re examination of Meinongianism This book does just that putting the theory on trial Part One considers if Russell truly defeated Meinongianism It addresses Meinongian rejoinders in response to Russell's main criticisms and further defends Russell's alternative solution his Theory of Descriptions Part Two explores the rationale for nonexistents and their use in interpreting three types of statements characterization negative existential and intentional The book argues that despite appearances Meinongianism cannot plausibly account for its own paradigm claims whereas Russell's framework with some further elucidation can explain these statements quite well Part Three primarily addresses claims about fiction exploring the short comings of Meinongian and Russellian frameworks in interpreting them The book introduces a contextualization solution and symbolic method for capturing the logical form of such claims one with the complexity to handle cross contextual statements including negative existential and intentional ones It finally considers where that leaves nonexistent objects ultimately rejecting such so called entities
