

The chiropractic college admission test: a proposal for its development and use

A cardinal characteristic of any profession is self-regulation. It is argued in the present paper that chiropractic has now reached a level of professional maturity that indicates the need for the final aspect of self-regulation: a standardized selection approach into professional schools or colleges. Quality control of membership can then begin at the entry point into the profession. An admission test – the Chiropractic College Admission Test (CCAT) – is proposed and outlined for use for the selection of candidates into chiropractic colleges. Such a test would be beneficial for students applying to the colleges, regulatory and licensing boards, to the profession as a whole, to the chiropractic colleges, to other professions, and to government as well as the general public. The proposed CCAT contains elements that are general to many health professions such as knowledge of the biological and physical sciences, verbal and linguistic reasoning and visual perceptual ability. The test, however, is proposed to have elements that are unique to chiropractic. Based on the performance of other admission tests (e.g. Dental Admission Test, Medical College Admission Test), it is argued that the CCAT could be constructed and used to have the highest technical properties of validity and reliability. Such a test would become an integral tool in maintaining quality assurance, beginning at the earliest point of the profession.

L'auto-réglementation est une caractéristique importante de toute profession. On explique dans cet article que la chiropratique a maintenant atteint un tel niveau de maturité professionnelle qu'il est nécessaire de passer au stade ultime de l'auto-réglementation en créant un moyen de sélection standard à l'entrée des écoles et les collèges. Le contrôle de la qualité des membres pourrait donc commencer au point d'entrée dans la profession. On suggère un test d'admission – le test d'admission du chiropratique collège (CCAT) – qui serait utilisé pour sélectionner les candidats à l'entrée des collèges de chiropratique. Un tel test serait bénéfique pour les étudiants qui présentent leur candidature dans les collèges, pour les offices de réglementation et d'évaluation, pour la profession toute entière, pour les collèges de chiropratique, pour les autres professions, pour le gouvernement et pour le grand public. Le CCAT proposé contient des éléments communs à plusieurs professions de la santé (connaissance des sciences biologique et physique, raisonnement verbal et linguistique et capacités de perception visuelle). Toutefois, le test propose d'intégrer des éléments uniques à la chiropratique. En se basant sur les performances d'autres tests d'admission (p. ex., le Test d'admission dentaire, le Test d'admission au collège médical), le CCAT pourrait être conçu et utilisé de façon à intégrer les plus hautes propriétés techniques de validité et de fiabilité. Un tel test pourrait devenir un outil intégral permettant de maintenir l'assurance de la qualité, en commençant au point d'entrée de la profession.
