I. T. Machin, 1998 During this century the Christian Churches of Britain have lost support and influence to the extent that their future is considered by some observers to be problematic They have also been confronted with an unprecedented concentration of social changes some of which have challenged central religious traditions and teachings This multi denominational study is the first to investigate these changes public and private across virtually the entire Christian spectrum Professor Machin shows that while there are examples of growing division between Churches over some social issues the more general response has been one of differences within Churches This fascinating and broad ranging study will be invaluable to all those interested in the Churches response to the social and moral challenges of twentieth century Britain      *Christianity and Industrial Problems. Matt Carter,2016-11-16 This book uncovers the philosophical foundations of a tradition of ethical socialism best represented in the work of R H Tawney tracing its roots back to the work of T H Green Green and his colleagues developed a philosophy that rejected the atomistic individualism and empiricist assumptions that underpinned classical liberalism and helped to found a new political ideology based around four notions the common good a positive view of freedom equality of opportunity and an expanded role for the state The book shows how Tawney adopted the key features of the idealists philosophical settlement and used them to help shape his own notions of true freedom and equality thereby establishing a tradition of thought which remains relevant in British politics today      **Monthly Bulletin.
