Rooted Resistance Norie R. Singer, Stephanie Houston Grey, Jeff Motter, 2020-09-01 From farm to table restaurants and farmers markets to support for fair trade and food sovereignty movements for food system change hold the promise for deeper transformations Yet Americans continue to live the paradox of caring passionately about healthy eating while demanding the convenience of fast food Rooted Resistance explores this fraught but promising food scene More than a retelling of the origin story of a

democracy born from an intimate connection with the land this book wagers that socially responsible agrarian mythmaking should be a vital part of a food ethic of resistance if we are to rectify the destructive tendencies in our contemporary food system Through a careful examination of several case studies Rooted Resistance traverses the ground of agrarian myth in modern America The authors investigate key figures and movements in the history of modern agrarianism including the World War I victory garden efforts the postwar Country Life movement for the vindication of farmers rights the Southern Agrarian critique of industrialism and the practical and spiritual prophecy of organic farming put forth by J I Rodale This critical history is then brought up to date with recent examples such as the contested South Central Farm in urban Los Angeles and the spectacular rise and fall of the Chipotle Food with Integrity branding campaign By examining a range of case studies Singer Grey and Motter aim for a deeper critical understanding of the many applications of agrarian myth and reveal why it can help provide a pathway for positive systemic change in the food system

Public Values Leadership Barry Bozeman,Michael M. Crow,2021-10-12 Instead of private gain or corporate profits what if we set public values as the goal of leadership Leadership means many things and takes many forms But most studies of the topic give little attention to why people lead or to where they are leading us In Public Values Leadership Barry Bozeman and Michael M Crow explore leadership that serves public values that is to say values that are focused on the collective good and fundamental rights rather than profit organizational benefit or personal gain While nearly everyone agrees on core public values there is less agreement on how to obtain them especially during this era of increased social and political fragmentation How does public values leadership differ from other types of organizational leadership and what

distinctive skills does it require Drawing on their extensive experience as higher education leaders Bozeman and Crow wrestle with the question of how to best attain universally agreed upon public values like freedom opportunity health and security They present conversations and interviews with ten well known leaders people who have achieved public values objectives and who are willing to discuss their leadership styles in detail They also offer a series of in depth case studies of public values leadership and accomplishment Public values leadership can only succeed if it includes a commitment to pragmatism a deep skepticism about government versus market stereotypes and a genuine belief in the fundamental importance of partnerships and alliances Arguing for a mutable leadership they suggest that different people are leaders at different times and that ideas about natural leaders or all purpose leaders are off the mark Motivating readers including students of public policy administration and practitioners in public and nonprofit organizations to think systematically about their own values and how these can be translated into effective leadership Public Values Leadership is highly personal and persuasive
