Ours is a time of rapid cultural change with new economic challenges People look to their governments for leadership and solutions But what can and should government do to meet the difficulties that beset a nation What can citizens expect from their elected representatives What is reasonable And what should citizens do What are their responsibilities This book addresses such fundamental issues through the eyes of Scripture and against the backdrop of North America's dual heritage of Christianity and humanism Government politics and the Bible do not seem like a good mix But as this book aims to show the Bible has much wisdom to teach us about the place and role of government and its citizens Biblical principles work because God knows how his world and his servant governments are supposed to function After all he ordained the governing authorities and the principles enunciated in his Word are timeless and remain practical This book introduces fundamental biblical principles that apply to government and politics The intent is to inform and to motivate the reader to get involved where possible in the political processes of the day Our legislators need the input and help from their knowledgeable Christian constituents

In the late nineteenth century in a number of continental European countries Christian associations of workers arose Christian trade unions workers cooperatives political leagues workers youth movements and cultural associations sometimes separately for men and women In some countries they formed a unified Christian labour movement which sometimes also belonged to a broader Christian subculture or pillar encompassing all social classes In traditional labour history Christian workers organizations were solely represented as dividing the working class and weakening the class struggle However from the 1980s onwards a considerable amount of studies have been devoted to Christian workers organizations that adopted a more nuanced approach This book takes stock of this new historiography To broaden the analysis each contribution compares the development in at least two countries thus generating new comparative insights This volume assesses the development of Christian workers organizations in Europe from a broad historical and comparative perspective The contributions focus on the collective identity of the Christian workers organization their denominational and working class allegiances and how these are expressed in ideology organization and practice Among the themes discussed are relations with churches and Christian Democracy secularization the development of the Welfare State industrial relations and the contribution to working class culture This volume is the result of a joint intellectual enterprise of the International
