analysis of secondary research as well as a wealth of deep research in primary sources such as letters diaries interviews court cases newspapers and other archival materials Glenn Feldman argues in *The Irony of the Solid South* that the history of the solid Democratic south is actually marked by several ironies that involve a concern with the fundamental nature of southern society and culture and the central place that race and allied types of cultural conservatism have played in ensuring regional distinctiveness and continuity across time and various partisan labels Along the way this account has much to say about the quality and nature of the New Deal in Dixie southern liberalism and its fatal shortcomings Feldman focuses primarily on Alabama and race but also considers at length circumstances in the other southern states as well as insights into the uses of emotional issues other than race that have been used time and again to distract whites from their economic and material interests Feldman explains how conservative political forces Bourbon Democrats Dixiecrats Wallace independents and eventually the modern GOP ingeniously fused white supremacy with economic conservatism based on the common glue of animus to the federal government A second great melding is exposed one that joined economic fundamentalism to the religious kind along the shared axis of antidemocratic impulses Feldman s study has much to say about southern and American conservatism the enduring power of cultural and emotional issues and the modern south s path to becoming solidly Republican

**The Irony of Early School Reform** Michael B. Katz, 2001 First published in 1968 *The Irony of Early School Reform* quickly became essential reading for anyone interested in American education One of the first books to survey the relationship between public educational systems and the rise of urbanization and industrialization *Irony* was instrumental in mapping out the origins of school reform and locating the source of educational inequalities and bureaucracies in patterns established in the nineteenth century This new and enhanced version of the classic text is now available for the legions of people who have asked for it It includes an update by the author along with the same cohesive text and criticism contained in the original Readers will appreciate that this edition brings back into print a book that holds an important place in the field of educational history and in the modern literature of educational reform assesses the impact of the original publication in light of writing about American history and education since its original publication and explains its continuing significance shatters warm and comforting myths about the origins of public education and shows how some of the most problematic features of public education have their origins in

nineteenth century styles of educational reform      **Scapegoats of September 11th** Michael Welch, 2006 Argues that the war on terror is a political charade that delivers illusory comfort stokes fear and produces scapegoats used as emotional relief Drawing on topics such as the Abu Ghraib scandal Guantanamo Bay and the controversial Patriot Act this work looks at the significance of knowledge language and emotion in a post 9 11 world      **Our Punitive Society** Randall G. Shelden, Morghan Vélez Young, 2020-12-10 This reader friendly exploration of the primary forces relevant to punishment poverty and political powerlessness highlights the necessity for humane alternatives to our current incarceration binge This provocative overview looks at the business of punishment and at the historical patterns of control regarding slavery the death penalty women the LGBTQ community juveniles and supervision The United States has the world s highest rate of incarceration a form of punishment that separates the least privileged from the rest of society creating populations of damaged lives All of society pays the price for overly punitive sanctions Equal justice is not possible in an unequal society Up to date statistics illustrate the race class and gender inequalities in the criminal justice system The criminal justice system has expanded for half a century Will challenges to policing succeed in narrowing the net of social control Will the cost of maintaining a massive system stimulate a transformation or will stakeholders support minimal reforms that do not threaten their interests The public is largely unaware of most of the workings of the criminal justice system Through this engaging text the authors hope to provide insights that encourage readers to examine the collateral effects of policies to address crime and the role of punishment      **The Appeal of Insurance** Geoffrey Wilson Clark, Christiane Thomann, 2010-01-01 The Appeal of Insurance is an excellent collection that reflects a growing interest in insurance research within the social sciences Clearly written and accessible to a variety of audiences this is a volume of world class scholarship Luis Lobo Guerrero School of Politics International Relations and Philosophy Keele University In the marketing of its products the insurance industry has always depended on a considerable dose of moral exhortation and enlightened appeal The Appeal of Insurance traces the ways in which insurance over the past three centuries perhaps more than any other business has grown in concert with a clientele largely of its own making Faced with a public that has preferred to avoid confronting the certainty of fatality or the probabilities of catastrophe insurance promoters have had to create a demand for their products first by persuading the public to see the world as ruled less by divine judgments and more by statistical patterns and second by proclaiming a moral imperative of hedging against death and disaster by the prudential recourse to insurance The essays presented here examine the history of insurance as a process of negotiation between the embedded social legal and cultural norms out of which the practice of insurance grew and the new arrangements and sensibilities that insurance itself helped bring into being Today insurance is a global economic colossus and a fixture in the developed countries of the world But neither the financial clout of the insurance industry nor its ubiquity conveys the full measure of its social and political influence The insurance industry has in fact become a primary agent of discipline and control over public and private behaviours by imposing upon them the

criterion of insurability By tracing the boundaries of acceptable and compensated from unacceptable and uncompensated risk insurers directly or indirectly govern people products and markets and by this process become one of the most powerful and pervasive agents of social and economic control Geoffrey Clark is a professor in the Department of History at the State University of New York at Potsdam Gregory Anderson is the former Associate Head of the Business School at the University of Salford Christian Thomann is a senior fellow at the Centre for Risk and Insurance at Leibniz University Hanover J Matthias Graf Von Der Schulenburg is the Director of the Centre for Risk and Insurance at Leibniz University Hanover Corrections Michael Welch, 2013-10-14 Corrections A Critical Approach 3rd edition confronts mass imprisonment in the United States a nation boasting the highest incarceration rate in the world This statistic is all the more troubling considering that its correctional population is overrepresented by the poor African Americans and Latinos Not only throwing crucial light on matters involving race and social class this book also identifies and examines the key social forces shaping penal practice in the US politics economics morality and technology By attending closely to historical and theoretical development the narrative takes into account both instrumental goal oriented and expressive cultural explanations to sharpen our understanding of punishment and the growing reliance on incarceration Covering five main areas of inquiry penal context penal populations penal violence penal process and penal state this book is essential reading for both undergraduate and graduate students interested in undertaking a critical analysis of penology **Juvenile Delinquency in a Diverse Society** Kristin A. Bates, Richelle S. Swan, 2016-11-30 Juvenile Delinquency in a Diverse Society Second Edition presents students with a fresh critical examination of juvenile delinquency in the context of real communities and social policies integrating many social factors that shape juvenile delinquency and its control including race ethnicity class gender and sexuality Authors Kristin A Bates and Richelle S Swan use true stories and contemporary examples to link theories of delinquency not just to current public policies but to existing community programs encouraging readers to consider how theories of delinquency can be used to create new policies and programs in their own communities Readers will gain a foundational understanding of the social diversity that contextualizes varying experiences and behavior of juvenile delinquency as well as a deeper appreciation for the policies social justice and community programs that make up the juvenile system **People v.
