

Criminological Theory Summaries

Theory	Main Points	Theorists/Researchers
Classical	Crime occurs when the benefits outweigh the costs—when people pursue self-interest in the absence of effective punishments. Crime is a free-willed choice. See also deterrence, rational choice.	Beccaria
Positivist	Crime is caused or determined. Lombroso placed more emphasis on biological deficiencies, whereas later scholars would emphasize psychological and sociological factors. Use science to determine the factors associated with crime.	Lombroso Guerry Quetelet
Individual Trait	Criminals differ from noncriminals on a number of biological and psychological traits. These traits cause crime in interaction with the social environment.	Glueck & Glueck Mednick Caspi Moffitt
Social Disorganization	Disorganized communities cause crime because informal social controls break down and criminal cultures emerge. They lack collective efficacy to fight crime and disorder.	Shaw & McKay Sampson Bursik & Grasmick
Differential Association Social Learning Subcultural	Crime is learned through associations with criminal definitions. These definitions might be generally approving of criminal conduct or be neutralizations that justify crime only under certain circumstances. Interacting with antisocial peers is a major cause of crime. Criminal behavior will be repeated and become chronic if reinforced. When criminal subcultures exist, then many individuals can learn to commit crime in one location and crime rates—including violence—may become very high.	Sutherland & Cressey Sykes & Matza Akers Wolfgang & Ferracuti Anderson
Anomic Institutional-Anomic	The gap between the American Dream's goal of economic success and the opportunity to obtain this goal creates structural strain. Norms weaken and 'anomic' ensues, thus creating high crime rates. When other social institutions (such as the family) are weak to begin with or also weakened by the American Dream, the economic institution is dominant. When such an institutional imbalance exists—as in the United States—then crime rates are very high.	Merton Messner & Rosenfeld

An Economic Analysis of Public Good Provision in Rural Russia Daniela Lohlein, 2003 Adequate access to public goods plays an important role in the economic and rural development of any country For the transition countries however providing public goods is particularly problematic owing to several factors associated with the transition process itself e g economic recession and a change in ownership of local public goods Taking Russia as an example this study examines the effect of the transition process on rural household s access to public goods With reference to education and health care household access to public goods is addressed in terms of community availability and economic access The analysis is taken a step further through an examination of the role of informal institutions in public good provision Multiple regression analysis was used to test for the significance of income as a determinant of private expenditures on public goods The results indicate that contrary to expectations neither income nor informal payments are important determinants of access to public goods Informal institutions continue to exert a strong influence on the provision of public goods

The Oxford Handbook of Criminological Theory Francis T. landscape The volume is organized not around schools of thought but around themes that shape much thinking about and research on crime This more unconventional approach seeks to show that criminological theory is not static but dynamic In fact most prominent scholars do not spend their time commenting upon and retesting theoretical propositions that have existed for many years Rather they move into more novel areas areas often located in the interstitial junctures between more traditional theories This Oxford Handbook presents a series of essays that captures not the past of criminology but where theoretical explanation is headed As a result the volume is replete with new ideas discussions of substantive topics with salient theoretical implications and reviews and interpretations of literatures that illuminate promising avenues along which theory and research should evolve Special attention is paid to how criminal participation is shaped intimately by individual traits diverse social contexts the situations in which the choice of crime is made and exposure to coercive experiences Each chapter can be read on its own as furnishing an important analysis of a given theoretical issue yet read as a whole The Oxford Handbook of Criminological Theory offers a unique and deep understanding of criminology at its cutting edge
