only should you implement AI regardless of your industry but once you do you should fight to stay true to your purpose your
ethical convictions indeed your humanity even as our organizations continue to evolve While not holding any punches about
the dangers posed by overpowered AI this book uniquely surveys where technology is limited and gives reason for cautious
optimism about the true opportunities that lie amidst all the disruptive change currently underway As such it is distinctively
more optimistic than many of the competing titles on Big Technology This compelling book weaves together business
strategy and philosophy of mind behavioral psychology and the limits of technology leadership and law The authors set out to
identify where humans and machines can best complement one another to create an enterprise greater than the sum total of
its parts the Humachine Combining the global business and forecasting acumen of Professor Nada R Sanders PhD with the
