Make Elephants Fly Steven S. Hoffman, 2017-11-14. Drawing on examples of the hottest innovators in Silicon Valley, this step-by-step guide will show you how to develop, test, and launch your impossibly big idea to success. Almost every major company today has made innovation its number one priority. Yet fewer than one in four executives believe their organizations are effective innovators. The pressure to innovate and the price paid for failure keeps rising while most companies haven't progressed at all. They are still using the same antiquated techniques pioneered decades ago. This is why some of the biggest corporations in the world manage to lose entire markets to startups they've never heard of. In today's world, everyone will need to innovate to stay competitive. It doesn't matter if you're a startup founder, corporate executive, small business owner, freelancer, or professional; there's a technology out there that's going to upend your industry. And if you aren't able to harness it to your advantage, someone else will. Innovation is no longer an option; it's the price of admission into the business world. *Make Elephants Fly* is designed to help you implement the same innovation methodologies and processes as Silicon Valley startups. It will teach you how startups come up with breakthrough products and services, how to structure innovation teams, the best ways to identify and vet new ideas, what it takes to foster a culture of innovation, how to establish a process of innovation throughout your organization. By the time you've digested this book, you will have the tools needed to

take your impossibly big idea and make it fly **The Palgrave Handbook of FinTech and Blockchain** Maurizio Pompella, Roman Matousek, 2021-06-01 Financial services technology and its effect on the field of finance and banking has been of major importance within the last few years. The spread of these so-called disruptive technologies including Blockchain has radically changed financial markets and transformed the operation of the industry as a whole. This is the first multidisciplinary handbook of FinTech and Blockchain covering finance, economics, and legal aspects globally. With comprehensive coverage of the current landscape of financial technology alongside a forward-looking approach, the chapters are devoted to the spread of structured finance, ICT, distributed ledger technology, DLT, cybersecurity, data protection, artificial intelligence, and cryptocurrencies. Given an unprecedented 2020, the contributions also address the consequences of the current emergency and the pandemic stroke, which is revolutionizing social and economic paradigms and heavily affecting Fintech, Blockchain, and the banking sector as well, and would be of particular interest to finance academics and researchers alongside banking and financial services professionals.
