Capitalism's Hidden Worlds Kenneth Lipartito,Lisa Jacobson,2020-01-24 A dynamic social history of shadow capitalism spanning the late nineteenth and twentieth centuries Observers see free markets the relentless pursuit of profit and the unremitting drive to commodify everything as capitalism s defining characteristics These most visible economic features however obscure a range of other less evident often unmeasured activities that occur on the margins and in the concealed corners of the formal economy The range of practices in this large and diverse hidden realm encompasses traders in recycled materials and the architects of junk bonds and shadow banking It includes the black and semi licit markets that allow wealthy elites to avoid taxes and the unmeasured domestic and emotional labor of homemakers and home care workers By some estimates the unmeasured economic activity that occurs within the household informal market and underground economy amounts to a substantial portion of all economic activity in the world as much as 30 percent in some countries Capitalism s Hidden Worlds sheds new light on this shadowy economic landscape by reexamining how we think about the market In particular it scrutinizes the missed connections between the official visible realm of exchange and the uncounted and invisible sectors that border it While some hidden markets emerged in opposition to the formal economy much of the obscured economy described in this volume operates as the other side of the legitimate state sanctioned marketplace A variety of historical actors from fortune tellers and forgers to tax lawyers and black market consumers have constructed this unseen world in tandem with the

observable public world of transactions Others such as feminist development economists and government regulators have worked to bring the darkened corners of the economy to light The essays in Capitalism s Hidden Worlds explore how the capitalist marketplace sustains itself how it acquires legitimacy and even prestige and how the marginalized and the dispossessed find ways to make ends meet Contributors Bruce Baker Eileen Boris Eli Cook Hannah Frydman James Hollis Owen Hyman Anna Kushkova Christopher McKenna Kenneth Mour Philip Scranton Bryan Turo **Productivity and the Pandemic** Philip McCann,Tim Vorley,2021-01-29 This forward thinking book examines the potential impacts of the Covid 19 pandemic on productivity Productivity and the Pandemic features 21 chapters authored by 46 experts examining different aspects of how the pandemic is likely to impact on the economy society and governance in the medium and long term Drawing on a range of empirical evidence analytical arguments and new conceptual insights the book challenges our thinking on many dimensions With a keen focus on place firms production factors and institutions the chapters highlight how the pre existing challenges to productivity have been variously exacerbated and mitigated by the pandemic and points out ways forward for appropriate policy thinking in response to the crisis
