with them all his life for their mastery of wind and ocean their aerial beauty and the unmatched wildness of the coasts and islands where every summer they return to breed The seabird's cry comes from an elemental layer in the story of the world Over the last couple of decades modern science has begun to understand their epic voyages their astonishing abilities to navigate for tens of thousands of miles on featureless seas their ability to smell their way towards fish and home Only the poets in the past would have thought of seabirds as creatures riding the ripples and currents of the entire planet but that is what the scientists are seeing now today **Library of Famous Fiction: pt. 1 Heavy yokes**, 1880 *I Love You*
