**A Practical Introduction to Homeland Security** Bruce Oliver Newsome, Jack A. Jarmon, 2020-03-17. This text provides students with a practical introduction to the concepts, structure, politics, law, hazards, threats and practices of homeland security everywhere, focusing on US homeland security, Canadian public safety and European domestic security. It is a conceptual and practical textbook, not a theoretical work. It is focused on the knowledge and skills that will allow the reader to understand how homeland security is and should be practiced. Globalization, population growth, migration, technology, aging infrastructure and the simple trend to higher expectations are making homeland security more challenging. Yes, homeland security really is a global problem. The hyperconnectivity of today's world has reduced the capacity of the United States to act unilaterally or to solve homeland risks from within the borders alone. Newsome and Jarmon explain the relevant concepts, the structural authorities and responsibilities that policymakers struggle with and within which practitioners must work, the processes that practitioners and professionals choose between or are obliged to use, the actual activities and the end states and outputs of these activities. Moreover, this book presents the concept of homeland security as an evolving experience rather than an artifact of life since 2001. It is a profession that requires some forming from the ground up as well as the top down.

Piracy and International Maritime Crimes in ASEAN Robert C. Beckman, J. Ashley Roach, 2012-01-01. This book makes an important contribution to the legal literature not only for the ASEAN region but also for the world at large. Both editors, Robert Beckman and J. Ashley Roach, are highly knowledgeable and experienced in the international law pertaining to piracy and international crimes. The chapters they write, combined with perspectives by authors from Greece, Sweden, Singapore, Philippines and elsewhere, provide a broad but detailed review of the current law and policy as well as remaining challenges.

Myron H. Nordquist, University of Virginia School of Law, US. This book is an outstanding analysis of piracy and maritime crimes in the ASEAN region, edited by two world-class law of the sea experts. It is must reading for anyone seriously interested in ending the scourge of piracy. John Norton Moore, University of Virginia and former United States Law of the Sea Ambassador. I can confidently say that this is the best book on the legal dimension of the problem of piracy in general and of piracy in Southeast Asia and off the coast of Somalia in particular and what we can do about it. Robert Beckman and Ashley Roach are two of the finest minds working in international law today. They have brought their knowledge and sharp analytical skills to edit a book of great relevance to the world's shipping industry, IMO, ASEAN and international lawyers and law enforcement agencies. Tommy Koh, United Nations Convention on the Law of the Sea. Southeast Asian waters are critical for international trade and the global economy. Combating maritime crimes has always been a priority as well as a challenge for ASEAN member states. While much emphasis has been placed on enhancing operational cooperation against maritime crimes, the need for an effective legal framework to combat such

maritime crimes has not been sufficiently examined This book demonstrates that ASEAN member states can establish a legal framework to combat maritime crimes by ratifying and effectively implementing relevant global and regional conventions It also explores the issues that ASEAN member states and ASEAN as an organization face in establishing such a framework and suggests suitable steps that can be taken to address such issues This informative and detailed study will inform research and policy and will appeal to government treaty and policy officials academics researchers and students as well as international and regional organizations concerned with piracy and other related maritime crimes ocean affairs and the law of the sea
