It supplies concrete guidelines and provides a roadmap for training that can be customized to any practice department or clinic setting. In this essential resource, Dr. Christine S. She dives deeply into the core components of assessment from optimizing testing conditions to standardized test administration to keen observations of behavior and includes coverage of topics such as testing with unique populations, behavioral management strategies for challenging situations, as well as promoting ongoing competence over time. A compilation of several sources of data, the book includes excerpts from Dr. Ghilain's practice-specific psychometry training manual along with advice and illustrative examples from many neuropsychologists and psychometrists who shared their experiences. Board Certification in Clinical Neuropsychology Kira E. Armstrong, PhD, ABPP, Dean W. Beebe, PhD, ABPP, Robin C. Hilsabeck, PhD, ABPP, Michael W. Kirkwood, PhD, ABPP, 2019-05-01 Pursuit of board certification through the American Board of Professional Psychology (ABPP) has become a standard expectation for clinical neuropsychologists. At the time this book was published, the American Board of Clinical Neuropsychology (ABCN) was the fastest-growing specialty board of ABPP with over 1,000 active members. However, the board certification process is challenging and can be intimidating. The objectives of this book are to demystify the process and provide practical advice for achieving board certification through ABPP/ABCN. To start, benefits of board certification are summarized, and common myths are debunked. Next, individual chapters for each step in the process, as well as a chapter devoted to pursuit of the pediatric subspecialty, provide details about essential elements of the task, the process, the timeline, strategies for success, common pitfalls, and what happens behind the scenes at ABPP/ABCN. Each of these chapters also has tips for trainees and supervisors who want to get a jump on preparing for board certification. Finally, encouragement and guidance are provided for individuals who encounter setbacks at any step along the way.
