Closing The Mind Gap Making Smarter Decisions In A Hypercomplex World:

Closing the Mind Gap Ted Cadsby, 2014-03-24 We have always struggled as human beings But our struggle today is exacerbated by a gap between the increasingly complicated world we have created and the default ways we think about it Twenty first century challenges are qualitatively different from the ones that generations of our ancestors faced yet our thinking has not evolved to keep pace We need to catch up To make smarter decisions as governments organizations families and individuals we need more sophisticated mental strategies for interpreting and responding to today s complexity Best selling author and business leader Ted Cadsby explores the insights of cognitive psychology anthropology biology neuroscience physics and philosophy to reveal the gap between how we typically tackle complex problems and what complexity actually requires of us In an accessible and engaging style he outlines ways to close the gap the strategic mental shifts that increase decision making effectiveness The bottom line We need greater complexity in our thinking to match the increasing complexity in our world and Cadsby shows us how

systems theory Cadsby provides readers with practical implications for improving their decision making process GARY KLEIN PhD Senior Scientist at MacroCognition LLC and author of *Seeing What Others Don't* distills the latest research in complexity theory and cognitive science and shows how we can debug our mental software to think and act more effectively DAVID ORRELL PhD mathematician and author of numerous books including *Truth or Beauty* and *Economyths* *Managing in Complexity* Sara Filbee, 2023-12-22 Challenging traditional ways of thinking leading and managing based on cutting edge research and real world examples this book provides an insightful and accessible perspective for leaders and managers in the 21st century who seek to become more effective in an increasingly uncertain and complex world which limits their ability to get results Just how significant this is has become all too evident in the Covid 19 pandemic Many books have been written to address these leadership and management challenges but they are based on the premise that there are ways to simplify organise and control what is going on in the workplace In our complex world this is not possible and there are no magic tools and techniques that will ensure success This book explains why and offers an alternative approach incorporating social theory and the sciences of uncertainty written in plain English by a leader with over 40 years of experience in the private not for profit and federal government sectors Each chapter focuses on a single key concept and is introduced by a story illustrating how these key ideas can be applied in the workplace and includes practical suggestions for leaders and managers at all levels and across sectors to incorporate these perspectives into their day to day work practice making it easy for readers to use the book as a reference guide All who manage in complex times and uncertain environments will appreciate this accessible and actionable book that will inspire a radical rethink of current management orthodoxy and help them to become more effective *Hard to Be Human* Ted Cadsby, 2021-10-12 Powerful strategies to combat the design flaws of the human brain that make life in the twenty first century unreasonably difficult If other animals could study us the way we study them they would be puzzled by our unique ability to inflict misery on ourselves We expend a lot of energy replaying past anguish anticipating future distress and stewing in self righteous anger Other animals would call us out for being oddly paradoxical creatures who long to be happy but who are the source of their own suffering We worry about things we have no control over We complain about not being understood while casting a critical eye on others We stubbornly defend our beliefs despite contradictory evidence Complicating all of this is our struggle to adapt to a complex world that we created who struggle to adapt to a confusing world that we ourselves created In our defence we haven't yet mastered our neuron packed brains whose incredible complexity evolved over millennia in a very different world than today's The result of this evolutionary journey Five design features that often morph into design flaws in need of fixing *Hard to Be Human* corrals the best insights from psychology neuroscience physics and philosophy to reveal powerful strategies for the five big battles we each face in the war with our misguided misbehaving selves Tapping into deeply personal stories to ground the concepts in real life Cadsby reveals how we can overcome our design flaws to be smarter happier and better adapted to the complexities

bad decision and become more aware of your life in general *Tune In* Nuala Walsh, 2024-03-26 Despite conventional wisdom the biggest risk confronting our generation isn't economic, political or climate risk. It's decision risk and the failure to hear who and what really matters. Your decisions impact others yet in today's noisy world of digital distraction, disinformation and data overload we're more vulnerable than ever to hearing less and less. In the dash to decide we sacrifice nuance for convenience, misinterpret people and misunderstand situations, accelerating a rush to misjudgement. The result: A catalogue of human errors, unheard voices and tone deaf leadership. Tuning out relevant voices degrades decisions, damages reputation and squanders opportunity, amplifying modern activism, rampant polarisation, scandals and scams. Now that can change. In *Tune In*, award-winning Nuala Walsh champions understanding behaviour as an insurance policy against mishearing, misinformation and misjudgement. This timely masterclass stands apart in its original treatment of deaf spots, the hidden judgement killers that stop us from hearing what really matters. It not only explains your worst mistakes but equips you to prevent future error and the sting of regret. Armed with a new science-led PERIMETERS framework and dozens of sonic strategies that rely on human intelligence, not artificial intelligence, you'll discover the 10 traps that bind our reasoning. Each is illustrated by a cast of Wall Street titans, sports legends, serial killers, presidents, astronauts, entrepreneurs, entertainers and exonerates. By tuning in, you'll hear what others don't and secure advantage. You'll stand out rather than miss out, becoming a more admired and influential Decision Ninja. Good judgement is at a premium and your decisions matter. It's time to *Tune In*.

The Unlimited Mind Zoe McKey, 2017-04-22 Terrified of making bad decisions and missing great opportunities? Do you question your judgment and doubt your intuition? Your brain is like any other muscle; it needs training to improve. Nobody is born with flawless critical thinking and judgment skills. These skills usually require systematic practice, but you can shortcut the learning curve by learning and mastering the methods of the best thinkers, psychologists and high achievers. This book collects all the tips, tricks and tactics of the most successful people to develop your inner smartness. *The Unlimited Mind* will show you how to think smarter and find your inner genius. This book is a collection of research and scientific studies about better decision making, fairer judgments and intuition improvement. It takes a critical look at our everyday cognitive habits and points out small but serious mistakes that are easily correctable. Discover and utilize the uncharted parts of your brain. Zoe McKey has studied human cognition for over a decade. To her, it was essential to know how others think to secure her own survival. This book collects her personal experiences and some of the most famous studies in cognitive improvement and social psychology to show you the way to better critical thinking, decision making and judgment. Leave analysis paralysis for yesterday. Learn how to overcome your mental blocks and improve your life. How to discover your personal excellence. The advantages of thinking like a professional and not an amateur. How to bring out your best creative thinking. Improve your intuition skills quickly and permanently. Don't get stuck on decisions ever again. Learn to use the 6 Hats Method™ to make the best multilateral decisions. Master your time management with Philip Zimbardo's time paradox theory. Learn to set goals.
