

The background of the book cover is a high-magnification, false-color aerial photograph of a complex integrated circuit (IC) die. The die is rectangular and filled with a dense, intricate pattern of circuitry. Various functional blocks are highlighted in different colors: large green rectangular areas, red rectangular blocks, purple and blue regions, and yellow/orange sections. A network of fine, light-colored lines (likely metal interconnects) crisscrosses the entire surface, connecting the various functional blocks. The overall appearance is that of a highly sophisticated and detailed microelectronic device.

Power and Timing Modeling, Optimization and Simulation Vassilis Paliouras, Johan Vounckx, Diederik Verkest, 2005-08-25 Welcome to the proceedings of PATMOS 2005 the 15th in a series of international workshops PATMOS2005 was organized by IMEC with technical co sponsorship from the IEEE Circuits and Systems Society Over

the years PATMOS has evolved into an important European event where searchers from both industry and academia discuss and investigate the emerging challenges in future and contemporary applications design methodologies and tools required for the development of upcoming generations of integrated circuits and systems. The technical program of PATMOS 2005 contained state of the art technical contributions, three invited talks, a special session on hearing aid design and an embedded tutorial. The technical program focused on timing performance and power consumption as well as architectural aspects with particular emphasis on modeling design characterization analysis and optimization in the nanometer era. The Technical Program Committee with the assistance of additional expert reviewers selected the 74 papers to be presented at PATMOS. The papers were divided into 11 technical sessions and 3 poster sessions. As is always the case with the PATMOS workshops, the review process was anonymous; full papers were required and several reviews were carried out per paper. Beyond the presentations of the papers, the PATMOS technical program was enriched by a series of speeches offered by world class experts on important emerging research issues of industrial relevance. Prof. Jan Rabaey, Berkeley, USA gave a talk on "Traveling the Wild Frontier of Ultra Low Power Design". Dr. Sung Bae Park, Seoul gave a presentation on "DVL: Deep Low Voltage Circuits and Devices".
