Care of the Patient with Special Needs provides a thorough review of the eye and vision care needs of patients with special needs. This book gives you a better understanding of the most frequently encountered developmental and acquired disabilities seen in the eye care practitioner's office. These disabilities include patients with autism, brain injury, Fragile X syndrome, and Down syndrome, as well as those with psychiatric illness, dual diagnosis, and more. The text discusses in great detail the visual issues inherent in these populations and their possible treatment. A group of authors with approximately 500 years of experience in the field of eye care and special populations have been brought together to develop this comprehensive reference. It may appear that this book is written primarily for eye care practitioners such as optometrists and ophthalmologists, while vision is the overriding topic, this book serves as an excellent resource for a multitude of professions including those engaged in occupational therapy, physical therapy, speech and language therapy, psychiatry, social work, pediatric medicine, and special education.

Build Your Own Medical Optometry Practice: Part 1: Medical Knowledge Second Edition Jeffrey Sedgewick, O.D., M.D., 2017-02-03. Most optometrists don't perform medical eye services, certainly not exclusively. You can develop a successful practice while providing a much needed service by bucking this trend. Jeffrey Sedgewick, O.D., M.D., spent 4 years as a practicing optometrist prior to entering medical school. While practicing as an optometrist and as an ophthalmologist, he has seen many examples of poor medical care by optometrists himself included. He is convinced that it doesn't have to be this way. He believes optometrists who start their own Medical Optometry Practice can fill an increasingly important function, but they need more knowledge and clinical experience, which he seeks to provide in this textbook. In his web site www.theodmdconsultinggroup.com in future courses and as a consultant to your Medical Optometry Practice.
