Havlick,2018-04-11 When viewed from space the Korean Peninsula is crossed by a thin green ribbon On the ground its mix of dense vegetation and cleared

borderlands serves as home to dozens of species that are extinct or endangered elsewhere on the peninsula This is Korea's demilitarized zone one of the most dangerous places on earth for humans and paradoxically one of the safest for wildlife Although this zone was not intentionally created for conservation across the globe hundreds of millions of acres of former military zones and bases are being converted to restoration areas refuges and conservation lands David G Havlick has traveled the world visiting these spaces of military to wildlife transition and in *Bombs Away* he explores both the challenges physical historical and cultural and fascinating ecological possibilities of military site conversions Looking at particular international sites of transition from Indiana's Big Oaks National Wildlife Refuge to Cold War remnants along the former Iron Curtain Havlick argues that these new frontiers of conservation must accomplish seemingly antithetical aims rebuilding and protecting ecosystems or restoring life while also commemorating the historical and cultural legacies of warfare and militarization Developing these ideas further he shows that despite the ecological devastation often wrought by military testing and training these activities need not be inconsistent with environmental goals and in some cases can even complement them a concept he calls ecological militarization A profound clear explication of landscapes both fraught and fecund marked by death but also reservoirs of life *Bombs Away* shows us how military activities conservation goals and ecological restoration efforts are made to work together to create new kinds of places and new conceptions of place

Talking to Strangers Monteagle Stearns, 2021-05-11 In this discerning book Monteagle Stearns a former career diplomat and ambassador argues that U S foreign policymakers do not need a new doctrine as some commentators have suggested but rather a new attitude toward international affairs and most especially new ways of learning from the Foreign Service True the word strangers in his title refers to foreigners However it also refers to American foreign policymakers and American diplomats whose failure to speak each other's language deprives American foreign policy of realism and coherence In a world where regions have become more important than blocs and ethnic and transnational problems more important than superpower rivalries American foreign policy must be better informed if it is to be more effective The insights required will come not from summit meetings or television specials but from the firsthand observations of trained Foreign Service officers Stearns has not written an apologia for the American Foreign Service however Indeed his criticism of many of its weaknesses is biting Ranging from a description of Benjamin Franklin's mission to France to an analysis of the Gulf War and its aftermath he offers a balanced critique of how American diplomacy developed in reaction to European models and how it needs to be changed to satisfy the demands of the twenty first century Full of examples drawn from Stearns's extensive experience *Talking to Strangers* addresses the problems that arise not only from an overly politicized foreign policy process but also from excessive bureaucratization and lack of leadership in the Foreign Service itself Anyone interested in our nation's future will benefit from reading Stearns's pull no punches analysis of why improving American diplomacy should be a matter of

urgent concern to us all **Popular Mechanics** ,1956-03 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle
