WHAT IS A PROGRAMMABLE ROOM THERMOSTAT?

The time on the programmer must be correct. Some types have to be adjusted in spring and autumn at the changes between Summer Time and British Summer Time.

You may be able to temporarily adjust the heating programme, for example 'Override', 'Advanced' or 'Boost'. These are explained in the manufacturer's instructions.

Programmable room thermostats need a hot flow of air to sense the temperature, so they must not be covered by curtains or blocked by furniture. Nearby electric fans, radiators, and air flow traps may prevent the thermostat from working properly.
