**Metaphor Studies: Theories, Methods, Approaches, and Future Perspectives** Ilaria Rizzato, Valentina Cuccio, Aletta Gesina Dorst, 2024-12-12 Metaphor has been studied as a linguistic conceptual and communicative phenomenon in a wide range of disciplines including linguistics literary studies philosophy education political science media studies communication science psychology and neurosciences While the Cognitive Theory of Metaphor has dominated the field since the cognitive turn in the 1980s alternatives have been proposed including the Neural Theory of Metaphor the Relevance Theory Approach the Complex Systems Approach and the Dynamic Systems Approach Though studies are still often text based there is a growing body of research on visual metaphor multimodal metaphor and gestural metaphor as well as experimental research ranging from studies on metaphor processing and comprehension to studies in NLP and machine learning Metaphor Studies is thus a highly interdisciplinary field that encompasses a myriad of theories approaches and methods In current metaphor research each of these strands is facing new challenges and offering new venues of cutting edge research using state of the art technologies Researchers tend to focus on their own research areas and provide in depth views within the scope of their own disciplines Metaphor Studies do not seem to escape this phenomenon in spite of the large number of disciplines they draw on ranging from linguistics to psychology to the theory of science Hence there seem to be little cooperation and communication across different fields methods and approaches having metaphors and figurative language as their main object of investigation This Research Topic aims to promote cross fertilization among the many research areas involved in Metaphor Studies thus bringing together different methods and perspectives and offering a comprehensive overview of the possible research scenarios

**Quantum Computing For The Brain** Melanie Swan, Renato P Dos Santos, Mikhail A Lebedev, Frank Witte, 2022-05-30 Quantum Computing for the Brain argues that the brain is the killer application for quantum computing No other system is as complex as multidimensional in time and space as dynamic as less well understood as of peak interest and as in need of three dimensional modeling as it functions in real life as the brain Quantum computing has emerged as a platform suited to contemporary data processing needs surpassing classical computing and supercomputing This book shows how quantum computing's increased capacity to model classical data with quantum states and the ability to run more complex permutations of problems can be employed in neuroscience applications such as neural signaling and synaptic integration State of the art methods are discussed such as quantum machine learning tensor networks Born machines quantum kernel learning wavelet transforms Rydberg atom arrays ion traps boson sampling graph theoretic models quantum optical machine learning neuromorphic architectures spiking neural networks quantum teleportation and quantum walks

Quantum Computing for the Brain is a comprehensive one stop resource for an improved understanding of the converging research frontiers of foundational physics information theory and neuroscience in the context of quantum computing

**Variation in Political Metaphor** Julien Perrez,Min Reuchamps,Paul H. Thibodeau,2019-08-06 The objective of this book is to understand variation in political metaphor Political metaphors are distinctive and important because they are used to achieve political goals to persuade to shape expectations to realize specific objectives and actions The analyses in the book go beyond the mere identification of conceptual metaphors in discourse to show how political metaphors function in the real world It starts from the finding that the same conceptual domains are used to characterize politics political entities and political issues Yet the specific metaphors used to describe these conceptual domains often change This book explores some of the reasons for this variation including features of political leaders e g their age and gender countries and other sociopolitical circumstances This perspective yields a better understanding of the role s of metaphors in political discourse

**The Moral Metaphor System** Ning Yu,2022-06-27 This book investigates moral metaphors in English and Chinese applying conceptual metaphor theory to a comparative study of the linguistic manifestation of the moral metaphor system rooted in the domains of bodily and physical experience Ning Yu sheds light on the metaphorical nature of moral cognition and how it is systematically manifested in language and explores the potential commonalities that define moral cognition in general as well as the differences that characterize distinct cultures The work investigates moral cognition at the cultural level as reflected in language based on linguistic evidence from both English and Chinese and to a limited extent multimodal evidence from the corresponding cultures The moral metaphor system is taken to consist of three major subsystems referred to as physical visual and spatial These subsystems are clusters of conceptual metaphors whose source concepts are from domains of embodied experiences in the physical world and which are formulated in contrastive categories with bipolar values for the target concepts of moral and immoral The study is characterized by two keywords system and systematicity The former refers to the fact that metaphors conceptual and linguistic are connected within networks and the latter to the need for those metaphors to be studied in such networks

*The Cultural and Artistic Legacy of Oliver Mtukudzi* Munyaradzi Nyakudya,Bridget Chinouriri,Pauline Mateveke,Ezra Chitando,2022-09-10 This book delves into a critical and comprehensive analysis of Mtukudzi s legacy as an outstanding musician who anchored his music on cultural identity specifically through the artistic manipulation of language As a cultural worker his remit extended beyond performance This raised his stature to the levels of such African music icons as Fela Kuti of Nigeria Salif Keita of Mali and Miriam Makeba Hugh Masekela of South Africa all towering giants in African musical performance This volume examines how Mtukudzi artistically manipulated language to convey a timeless message of cultural identity fighting for the respect of rights for women children and all It unpacks how Mtukudzi subtly uses language to put across political views that speak truth to power harnessing Zimbabwean language to articulate and promote the nation s cultural heritage and to advocate for societal development and the promotion

of rights of vulnerable groups The chapters in this volume are a mix of interdisciplinary Zimbabwean scholars of linguistics performance studies religion history communication and media studies unravelling Mtukudzi as a fighter for human rights and justice who subtly critiqued political systems and practices It concludes that Mtukudzi strove to be a cultural worker who used the power of language through music to contribute towards the rehabilitation of a battered African identity **Odisea**
