**DB2 9 for z/OS: Packages Revisited** Paolo Bruni,Sean A. Dunn,Howard Hirsch,Norihiko Nakajima,Suresh Sane,IBM Redbooks,2012-08-03 DB2 packages were introduced with DB2 V2 3 in 1993 During the 15 years that have elapsed a lot has changed In particular there is a more widespread use of distributed computing Java™ language new tools and upgrades in the platform software and hardware The best practices back then just might not be optimal today In this IBM Redbooks publication we take a fresh look at bringing packages into the 21st century We begin with an overview of packages and

explain the advantages of using packages Because database request module DBRM based plans have been deprecated in DB2 9 you need to convert to packages if you did not use packages already We provide guidance on using a DB2 provided function to convert from DBRM based plans to packages We re examine the application development frameworks for packages program preparation package setup and execution For distributed applications we include a discussion of a utility to identify and remove deprecated private protocol and converting to DRDA as well as an introduction to the new pureQuery function of Data Studio We also discuss common problems and their resolutions We then explore administration and operational activities dealing with packages including security access path management where we discuss the newly introduced package stability feature to allow for a seamless fallback and management and performance aspects The appendixes include useful queries and mention tools for managing packages effectively

**Streamline Business with Consolidation and Conversion to DB2 for z/OS** Paolo Bruni,Marcos Caurim,Elise Gotay,Susan Lawson,Glenn McGeoch,Rebecca Poole,IBM Redbooks,2014-11-05 Time to market flexibility and cost reduction are among the top concerns common to all IT executives If significant resource investments are placed in mature systems IT organizations need to balance old and new technology Older technology such as non IBM pre relational databases is costly inflexible and non standard Users store their information on the mainframe and thus preserve the skills and qualities of service their business needs But users also benefit from standards based modernization by migrating to IBM DB2 for z OS With this migration users deliver new application features quickly and respond to changing business requirements more effectively When migrating the main decision is choosing between conversion and re engineering Although the rewards associated with rebuilding mature applications are high so are the risks and customers that are embarking on a migration need that migration done quickly In this IBM Redbooks publication we examine how to best approach the migration process by evaluating the environment assessing the application as a conversion candidate and identifying suitable tools This publication is intended for IT decision makers and database administrators who are considering migrating their information to a modern database management system
