Regional and Global Regulation of International Trade Francis Snyder, 2002-07-05 The processes of legal and economic integration at a regional and global scale have created powerful legal and economic dilemmas They challenge the paradigms of constitutionalism including the State s monopoly of constitutionalism the autonomy of national political communities and the traditional forms of participation and representation The phenomena of globalisation and regional forms of governance have promoted the inter dependence of national political communities and

destroyed the artificial boundaries upon which national constitutional democracies are found and from which they derive their legitimacy Furthermore it is inevitable that the development of international trade and economic integration will raise claims for some form of global distributive justice to complement the wealth maximisation arising from free trade This will come from the gradual development of global forms of political discourse and law making challenging State constitutionalism and requiring some of the instruments and theories of constitutionalism The essays in this collection written by leading scholars in international trade law argue the pros and cons of greater regional and global regulation They conclude that whatever the final framework for international trade the critical decisions about institutional form and content will be decided in an emerging global political arena They help to identify this political arena who governs it and according to which rules and identify the different institutional alternatives in that global political arena

into how academic institutions spur their surroundings The volume sheds light on universities as regional development actors from a historical perspective by introducing institutional changes and discussing the interrelatedness of society business and academia It provides detailed investigations on various knowledge transfer mechanisms to help understand the diverse ways through which ideas and intellectual property can flow between universities and businesses Detailed case studies from three continents Europe Asia and America demonstrate the highly contextual nature of the interactions between academia industry and government

Financial Stability Issues: The Case of East Asia Mamiko Yokoi-Arai, 2002-07-08 Whatever can be said about the financial crises that have plagued East Asian countries since the early 1990s it must be averred that they teach us a great deal Many earlier assumptions about finance and investment have been called into question and the field is more open than it has been in many decades to legal and economic analysis and theory In particular issues of financial sector reform have come into sharp focus Here is a new proposal solidly grounded in current reality for a regional zone of law designed to supplement and benefit domestic reforms under way in Japan and the three emerging economies of Indonesia South Korea and Thailand The author draws on a wide range of relevant material including exploration of international standards and best practices in banking and finance the experience of the U S and the U K in planning and implementing reform measures and the theoretical literature respecting financial crises and what causes them In this context the specific reforms applied in the four Asian countries under consideration are discussed in detail with lessons to be learned about crisis detection containment and prevention During the course of the analysis the author reveals fundamental policy areas where meaningful and effective reform can take place

Financial Stability Issues: The Case of East Asia offers numerous practical applications at the same time as it strikes a rich vein of theory in the field Its fresh sensible approach will be greatly appreciated not only by academic theorists but by hardheaded business people policymakers and regulators as well
