Management of Banking and Financial Services: Padmalatha Suresh, Justin Paul, *Management of Banking and Financial Services* focuses on the basic concepts of banking and financial services and how these concepts are applied in the global banking environment as well as in India. In addition to presenting the big picture of the *Management Of Banking And Financial Services, 2/E* Suresh Padmalatha, 2011-09. The dynamic banking and financial services environment in the country calls for prudent decision making under pressure. *Management of Banking and Financial Services* provides students and practitioners with a thorough understanding of managerial issues in the banking and financial services industry, enabling them to evaluate the overall organisational impact of their decisions. The first section of the book focuses on the basic concepts of banking and financial services, and the other sections explain how these concepts are applied in the global banking environment as well as in India. In addition to presenting the big picture of the banking and financial services industry, the book also provides useful tips on the trade off between risk and return. European Financial Regulation Veerle Colaert, Danny Busch, Thomas Incalza, 2019-12-26. Mirroring the long established structure of the financial industry, EU financial regulation as we know it today approaches banking, insurance, and investment services separately and often divergently. In recent decades, however, the clear separation between financial sectors has gradually evaporated as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries. As the contours of the traditional tripartition in the financial industry have faded, the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality. This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross sectoral perspective. For each specific research theme, including prudential regulation, corporate governance, and conduct of business rules, the similarities as well as gaps, overlaps, and unjustifiable differences between banking, securities, and insurance regulation are clearly presented and discussed. This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes.
