Handbook of Research on Strategic Developments and Regulatory Practice in Global Finance Olgu, Özlem, Dinçer, Hasan, Hacıoğlu, Ümit, 2014-11-30 The global financial crisis has called to attention the

importance of financial development to economic growth as modern countries continue to struggle with debt unemployment and slow growth However a lack of agreement on how to define and measure financial development slows the development of global financial systems and markets The Handbook of Research on Strategic Developments and Regulatory Practice in Global Finance creates a common framework for not only identifying but discussing the key factors in establishing a strong global market and financial system This book will be a valuable reference for those interested in an in depth understanding of the financial markets and global finance including academics professionals and government agencies and institutions The Difficult Construction of European Banking Union David Howarth,Joachim Schild,2020-06-29 The Difficult Construction of European Banking Union examines the political legal and economic issues surrounding the lacunae and design faults of European Banking Union and its problematic operation The volume brings together the work of sixteen scholars focused on the diverse debates surrounding the construction and operation of Banking Union BU and its necessary reform BU represents one of the most important developments in European integration since the launch of Monetary Union Furthermore the design of the BU agreed between 2012 and 2014 was a messy compromise among EU member states It is not surprising then that BU has sparked a lively academic debate and triggered an ever growing number of publications from different disciplinary backgrounds The first wave of academic work on BU focuses upon the economic rationale underpinning the supranationalisation of control over banking regulation supervision support and resolution and the political dynamics and legal issues that shaped the design of the Union agreed This volume is located at the intersection of this first phase of academic research and a second stage which analyses the functioning of the different elements of BU New research questions are triggered by the albeit limited empirical evidence on BU s implementation and operation Contributions to this second wave of research attempt to identify potentially dangerous lacunae and contribute to on going reform debates The Difficult Construction of European Banking Union will be of great interest to scholars of the European Union Banking Economic Governance and Political Economy Most of the chapters were originally published as three special issues in the Journal of Economic Policy Reform Financial Sector Regulation and Reforms in Emerging Markets Eswar S. Prasad,National Bureau of Economic Research,2010 This paper provides an overview of the complex conceptual and practical challenges that emerging market economies face as they attempt to reform their frameworks for financial regulation These economies are striving to balance the quest for financial stability with the imperatives of financial development and broader financial inclusion I argue that these objectives can in fact reinforce one another I also discuss aspects of macroeconomic policies and cross border regulation that have implications for financial stability and the resilience of the financial sector in emerging markets
