Innovative Experiences in Access to Finance

Augusto de la Torre,Juan Carlos Gozzi,Sergio L. Schmukler,2017-06-23 Interest in access to finance and awareness of its importance have increased significantly since the early 2000s Growing evidence suggests that lack of access to credit prevents many households and firms from financing high return investment projects which has an adverse effect on growth and poverty alleviation Despite the increasing awareness of the importance of access to finance among both researchers and policymakers there are still some major gaps in our understanding of the main drivers of access as well as about the impact of different policies in this area This book aims to fill some of these gaps by discussing recent innovative experiences in

broadening access to credit in Latin America These experiences are consistent with an emerging new view that while recognizing the central role of the public sector in improving the contractual and informational environment for financial markets also contends that there might be room for well designed restricted interventions in collaboration with the private sector to foster the development of financial markets and broaden access to them In particular the book analyzes among other things some interesting experiences from Brazil Chile Colombia and Mexico that use different instruments to broaden access to credit in a sustainable way such as structured finance factoring credit guarantees and correspondent banking Most of these experiences have led to financial innovation by developing new financial products and coordinating different players in the financial and real sectors to overcome barriers to access to credit The book provides a first systematic analysis of these innovative experiences including an analytical framework to understand problems of access to finance and a discussion of the effects and optimal design of public interventions Finally the book discusses some open policy questions about the role of the private and public sectors including state owned banks in broadening access to finance in a sustainable and market friendly manner *OECD Economic Surveys: Belgium 2017* OECD,2017-06-20 Belgium performs well in many economic and social dimensions However in spite of several important reforms in recent years productivity growth has weakened markedly since the financial crisis Reinvigorating productivity growth is vital to sustaining increases in living standards

Risk

Management Céline Bérard,Christine Teyssier,2018-01-04 Risk management practices are growing both in number and complexity in businesses notably driven by new regulatory standards that feature risk management at their core Although large businesses are more likely to adopt a formal holistic approach to risk management the stakes are just as high for SMEs Risk management in SMEs can contribute to a certain organizational entrepreneurial and partnership dynamic which constitutes a real opportunity to evolve practices and improve performance This book offers varied responses to this question by combining conceptual approaches empirical illustrations and the associated managerial implications
