These challenges force national security professionals, whose primary mission is to establish security, to focus on security issues in a multidimensional way in order to fulfill their duties. Therefore, the quality of the adopted national security conception is critical to deal with current national security issues. An Introduction to Operational Security Risk Management Dr. Tony Zalewski, 2019-01-09 This introductory book provides a sound foundation for operational security risk practitioners as well as others with an interest or responsibility for security in our rapidly changing and often unpredictable global environment It is not intended as an alternative to specialised texts on security issues but rather as a supplement to theoretical perspectives and practical guidelines including standards on the subject As the nature and character of risk in the modern world continues to evolve and present new and unanticipated challenges there is a need for innovative approaches to protective security that focus on the operational level where risks impact most upon people as well as the information systems property and general business and community activities that define their everyday lives This book makes an important contribution to this goal Security related risks are an unavoidable part of day to day life and need to be treated seriously by all organisations regardless of size or location But as the late German sociologist Ulrich Beck observed in his seminal work on the contemporary nature of risk World Risk Society in the modern world risk and responsibility are intrinsically connected Therefore although risks can be categorised under any number of headings such as personnel property technological legal regulatory financial and reputational what is ultimately needed by those tasked with the responsibility of managing risk is a framework that acknowledges the fluidity of risk but at the same time places human activity as the focal point of mitigation efforts Dr Tony Zalewski s book makes an important contribution to this goal
