Levy, 2019-11-05 This book provides readers with a basic understanding of the principles that underlie real estate development A brief historical overview and an introduction to basic principles are followed by examples from practice Case studies focus on how cities change and respond to the economic technological social and political forces that shape urban development in North America It is important to have a framework for understanding the risks and rewards in real estate investing In measuring return consideration must be given to both investment appreciation and the cash flow generated over the life of a project In addition metrics are presented that can be useful in assessing the financial feasibility of a real estate development proposal This book also provides an overview of the forces of supply and demand that gauge the potential market for a new project In determining the size of residual demand estimates for population growth family formation and new development are important All development projects fall under the

auspices of one or several jurisdictions Though every jurisdiction has different rules and procedures basic knowledge of the planning process is critical to the success of all development projects regardless of location Furthermore all projects have a legal component Basic issues of land ownership property rights property transfer and land registration are reviewed all of which need to be considered when a property is sold or purchased This book also provides a primary on the design and construction process In constructing a building a team of experts is first required to design the architectural structural and heating ventilation and air conditioning HVAC systems for a building An overview is provided of each building system wood concrete and steel Critical to a successful real estate development project management principles for the processes of design bidding and construction are explored with close attention given to budgeting scheduling and resource management Essential reading for anyone involved in the development of our built environment this is a must read introduction for students and professionals in architecture urban planning engineering or real estate seeking an approachable and broad view of real estate development and finance

Contemporary Urban Landscapes of the Middle East Mohammad Gharipour, 2016-03-17 The Middle East is well known for its historic gardens that have developed over more than two millenniums The role of urban landscape projects in Middle Eastern cities has grown in prominence with a gradual shift in emphasis from gardens for the private sphere to an increasingly public function The contemporary landscape projects either designed as public plazas or public parks have played a significant role in transferring the modern Middle Eastern cities to a new era and also in transforming to a newly shaped social culture in which the public has a voice This book considers what ties these projects to their historical context and what regional and local elements and concepts have been used in their design

Planning for Equitable Urban Agriculture in the United States Samina Raja, Marcia Caton Campbell, Alexandra Judelsohn, Branden Born, Alfonso Morales, 2024-03-19 This open access book building on the legacy of food systems scholar and advocate Jerome Kaufman examines the potential and pitfalls of planning for urban agriculture UA in the United States especially in how questions of ethics and equity are addressed The book is organized into six sections Written by a team of scholars and practitioners the book covers a comprehensive array of topics ranging from theory to practice of planning for equitable urban agriculture Section 1 makes the case for re imagining agriculture as central to urban landscapes and unpacks why how and when planning should support UA and more broadly food systems Section 2 written by early career and seasoned scholars provides a theoretical foundation for the book Section 3 written by teams of scholars and community partners examines how civic agriculture is unfolding across urban landscapes led largely by community organizations Section 4 written by planning practitioners and scholars documents local government planning tied to urban agriculture focusing especially on how they address questions of equity Section 5 explores UA as a locus of pedagogy of equity Section 6 places the UA movement in the US within a global context and concludes with ideas and challenges for the future The book concludes with a call for planning as public nurturance an approach that can be illustrated through urban agriculture

Planning as public nurturance is a value explicit process that centers an ethics of care especially protecting the interests of publics that are marginalized It builds the capacity of marginalized groups to authentically co design and participate in planning policy processes Such a planning approach requires that progress toward equitable outcomes is consistently evaluated through accountability measures And finally such an approach requires attention to structural and institutional inequities Addressing these four elements is more likely to create a condition under which urban agriculture may be used as a lever in the planning and development of more just and equitable cities This is an open access book This is an open access book
