**The Idea of Education** David Seth Preston, 2003 This book represents a position statement from the intellectually vibrant and challenging debate that emanated from the inaugural conference project launch entitled *The Idea of Education* held at Mansfield College Oxford in July 2002 The book conveys a wide spectrum of views about the idea of education in recognition of the fact that the idea is not as straightforward as it may appear on the surface It seems the universities are not alone in this apparent uncertainty of definition Further Education seems equally nonplussed as regard its purpose or raison d'être Furthermore even for those within the sector it appears to be a point of much contention as to where Further Education ends and Higher Education begins The book is divided into three main sections *The Current Structures of Education* *Issues within Contemporary Education* and *The Ambitions of Education* The chapters wrestle sometimes at variance with each other with the paradoxes and concerns felt by each writer grappling with the idea of education

*At the Interface*, 2004-01-01 In a world increasingly

characterised by perpetual re invention through the dynamic flows of capital persons and ideas understanding change and transformation is an imperative The purpose of this book is a first step in a project to engage the dynamics of transformation at the interface of culture and politics through contextualisation reflection and a sharing of intellectual resources Bringing together the work of academics from a range of disciplines who share an overarching aim to map such transformations the volume covers themes ranging from popular culture the Internet to film and cinema Casting a contemporary gaze on cultural phenomena the contributors all seek to trace trajectories of change and continuity from within their own specific field using a range of approaches from theoretical reflection to empirical case studies Of general interest to students of the humanities and social sciences and of particular interest for students of cultural studies and communication at all levels this volume constitutes a unique opportunity to reflect on recent transformations but also on the persistence of certain cultural and political practices

**Euroscepticism** Robert Harmsen, Menno Spiering, 2004 The accelerated pace of European integration since the early 1990s has been accompanied by the emergence of increasingly prominent and multiform oppositions to the process The term Euroscepticism has appeared with growing frequency in a range of political media and academic discourses Yet the label is applied to a wide range of different and occasionally contradictory phenomena Although originally associated with an English exceptionalism relative to a Continental project of political and economic integration the term Euroscepticism is now also identified with a more general questioning of European Union institutions and policies which finds diverse expressions across the entire continent This volume of European Studies brings together an interdisciplinary team of contributors to provide one of the first major multinational surveys of the growth of these Eurosceptic tendencies Individual chapters provide detailed examinations of developments in France Germany the Netherlands the United Kingdom Ireland Sweden Austria the Czech Republic Poland and Switzerland

Overall the volume draws a distinctive portrait of contemporary Euroscepticism situating the phenomenon not only relative to the progress of European integration but also in relation to broader questions concerned with the evolution of party politics and the reshaping of national identities

Contemporary Issues in Education David Seth Preston, 2005 Following the warm reception given to *The Idea of Education* a volume of papers in this same Rodopi Series a second conference around similar themes was held at Oxford University and this book is the result This edited book provides the reader with a fairly representative coherent and cohesive statement of the 2003 Oxford conference Quoting the Chancellor of Paris University with regretting that in the old days lectures were more frequent but now the time taken for lectures is being spent in meeting and discussions our keynote Frank McMahon made the profound observation that some of the issues around education have been with us for a surprisingly long time Notwithstanding the longevity of some questions concerning education this book details and examines contemporary educational practice and theory and as such it is a very important work

**Higher Education and Hope** Paul Gibbs, Andrew Peterson, 2019-04-02 Around the world the landscape of Higher Education is increasingly shaped by discourses of employability rankings and student satisfaction Under these conditions the role of universities in preparing students for all facets of life and to contribute to the public good is reshaped in significant ways ways which are often negative and pessimistic This book raises important and pressing questions about the nature and role of universities as formative educational institutions drawing together contributors from both Western and non Western perspectives While the editors and contributors critique the current situation the chapters evince a more humane and compassionate framing of the work of and in universities based on positive and valued relationships and notions of the good Drawing together a wide range of theoretical and conceptual frameworks to illuminate the issues discussed this volume changes the debate to one of hopefulness and inspiration about the role of higher education for the public good ultimately looking towards a potentially exciting and rewarding future through which humanity and the planet can flourish
