Project Management in Small and Medium-Sized Enterprises Anna

Brzozowska, Wojciech Dyduch, Aleksander Pabian, Agnieszka Dziedzic, 2023-12-06 The growing importance of projects in organizations combined with difficulties in their implementation is accompanied by the need for professional knowledge in the field of project management. It results from the complexity of project management problems and the difficulty of knowledge that must be applied. However, surprisingly little is known about this topic, especially in the context of European small and medium-sized enterprises (SMEs). *Project Management in Small and Medium-Sized Enterprises: A European Perspective* attempts to fill this specific research gap. The book analyses the process of managing projects being implemented by small and medium-sized firms from Europe, identifies organizational processes and verifies which elements of these processes require improvement. It concentrates on issues around the multifaceted characteristics of project management with particular emphasis on the process of managing European small and medium enterprises. The book is the result of many years of empirical research and consists of two main parts: A systematization of concepts, terminology and thus knowledge in the field of project management with particular emphasis on the phases of planning, organizing as well as leading and controlling in the project as well as small and medium-sized enterprises with particular emphasis on their specificity and role in the modern European economy; A systematization of concepts, terminology and thus knowledge in the field of project management with particular emphasis on the phases of planning, organizing as well as leading and controlling in the project as well as small and medium-sized enterprises with particular emphasis on their specificity and role in the modern European economy. Verification and development of such model procedures in the management of projects so that the SME enterprises functioning will be efficient and effective. There is a close relationship between the two parts. The theoretical part is the foundation on which practical considerations are later carried out. Integrating theoretical and practical issues, the book introduces new content to the literature and has the practical value of indicating how to manage projects in SMEs in the European Union. It also examines the decision-making processes related to project management in these organizations.

Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town, South Africa. 7 Sept 2016 - 8 Sept 2016. Theme: Sustainable economies in the information economy. Purpose: To share the quality academic papers presented at the International Conference on Business and Management Dynamics (ICBMD) held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town. As grey literature, the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates. Methodology: The methodology used varies from researcher to researcher but are suitable for the studies conducted. Thus, on the one hand, studies that were subjective in nature used the interpretive

paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment
