## **Contested Terrain Power Politics And Participation In Suburbia Contributions In Political Science:**

*Contested Terrain* Marc L. Silver, Martin Melkonian, 1995-07-10 Politics by its nature is a contentious arena Suburbia on the other hand has long presented the image of a relatively serene harmonious and homogenous social context Until recently little attention has been paid to whatever might be the distinctive qualities of the suburban political scene Yet as this collection of essays makes apparent suburbia is as volatile a political environment as any other The suburban political sphere is truly a contested terrain and this volume effectively shows the links between suburban political realities and our collective economic and social well being The suburban political sphere is truly a contested terrain As the authors make clear the political conflicts that have haunted the United States from its inception class inequalities racial frictions constraints on the democratic impulse loom large in the suburbia of today The haven from social turmoil and strife that suburbia represented at mid century increasingly appears to have been short lived and perhaps even illusory Political scientists sociologists and other researchers as well as concerned citizens are challenged to examine seriously the suburban political landscape In this volume all will come away with a better understanding of the distinctive practical facets of the suburban political context and all will have a better appreciation of the connections to our collective economic and social well being *Sociological Abstracts*, 2004 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers

when marginal groups meet mainstream forces The chapters will enliven academic debates over what constitutes a cultural mainstream or margin This volume explores theories problems and contemporary struggles over identity and representation ideology and hegemony and discourse and action The essays focus on critical questions covering postcolonial theory primitivism feminism sexuality the body art multiculturalism the environmental crisis the mass media and social movements The authors examine diverse issues ranging from the writing of women prisoners to how media policy is embedded in cultural history to the political implications of cultural representations in cross cultural contexts Altogether the diversity and depth of the text will help us develop new and complementary ways of thinking about critical questions in the politics of culture
