Certified Federal Contract Manager Study Guide National Contract Management Association, The CFCM Study Guide is designed to assist candidates in reading the FAR by summarizing each part and highlighting critical definitions and information. It is intended as a detailed study outline of the main topics within each FAR part and includes specific references. The 4th Edition is divided by FAR subchapters A-H. Each subchapter section contains a brief at a glance summary of the FAR parts contained in that subchapter followed by a more in depth summary of each part. The CFCM Study Guide provides references to specific thresholds, limitations, and requirements. Use the citations provided in the guide to find the most up to date thresholds in the FAR. This study guide has been updated to incorporate changes up to and including Federal Acquisition Circular 2021-06. As stated above, CFCM candidates are responsible for updates. Check National Contract Management's website for additional information about what is covered on the CFCM examination. The CFCM Study Guide comes with a full CFCM practice exam at the end of the book as well as an answer key to self-grade your responses. As noted, the questions on the practice exam may resemble those on the examination but were developed independently of the actual exam. Therefore, they are not the actual exam questions. Memorization of the practice exam questions and answers is not sufficient preparation for the examination.

DoD Contract Management Conference, 1968 *Contract Management Engineering Manual for DLA*. United States. Defense Logistics Agency, 1984 *Introduction to Construction Contract Management* Brian Greenhalgh, 2016-08-05. This book is an introduction to construction contract administration and management covering the delivery and execution stage of a construction project and the various issues which the contract administrator needs to proactively manage. It can therefore be used as a contract administrator's resource book covering what needs to be done and why to keep a construction project on track from a commercial and contractual perspective. It is particularly appropriate for students and new practitioners from varied construction professions and whilst it covers domestic UK projects, it will be particularly useful for those studying and working on international projects where terminology, procedures, and legal systems may differ from the UK. The content is split into four parts and is subdivided into easy-to-read chapters replicating the timeline of a project during the construction stage. Part A covers initiating the construction stage project delivery mechanisms, contract administration, and health and safety management. Part B covers managing the construction stage contractor performance and relationship management. Part C covers finalising the construction stage project completion and close out. Part D covers claims and disputes. *Introduction to Construction Contract Management* will be particularly useful for students enrolled on global construction programmes together with international distance learning students and non-cognate graduates starting out on an international career in construction contract administration and quantity surveying.
