organizations researchers and health professionals The Fight Against Doubt Inmaculada de Melo-Martín, Kristen Intemann, 2018-07-02 The lack of public support for climate change policies and refusals to vaccinate children are just two alarming illustrations of the impacts of dissent about scientific claims Dissent can lead to confusion false beliefs and widespread public doubt about highly justified scientific evidence Even more dangerously it has begun to corrode the very authority of scientific consensus and knowledge Deployed aggressively and to political ends some dissent can intimidate scientists stymie research and lead both the public and policymakers to oppose important public policies firmly rooted in science To criticize dissent is however a fraught exercise Skepticism and fearless debate are key to the scientific process making it both vital and incredibly difficult to characterize and identify dissent that is problematic in its approach and consequences Indeed as de Melo Martín and Intemann show the criteria commonly proposed as means of identifying inappropriate dissent are flawed and the strategies generally recommended to tackle such dissent are not only ineffective but could even make the situation worse The Fight Against Doubt proposes that progress on this front can best be achieved by enhancing the trustworthiness of the scientific community and by being more realistic about the limits of science when it comes to policymaking It shows that a richer understanding of the context in which science operates is needed to disarm problematic dissent and those who deploy it This the authors argue is the best way forward rather than diagnosing the many instances of wrong headed dissent *The Vietnam War in Popular Culture* Ron Milam, 2016-11-07 Covering many aspects of the Vietnam War that have not been addressed before this book supplies new perspectives from academics as well as Vietnam veterans that explore how this key conflict of the 20th century has influenced everyday life and popular culture during the war as well as for the past 50 years How did the experience of the Vietnam War change the United States not just in the 1950s through the 1970s but through to today What role do popular music and movies play in how we think of the Vietnam War How similar are the recent wars in Iraq and Afghanistan and now Syria to the Vietnam War in terms of duration cost success and failure rates and veteran issues This two volume set addresses these questions and many more examining how the Vietnam War has been represented in media music and film and how American popular culture changed because of the war Accessibly written and appropriate for students and general readers this work documents how the war that occurred on the other side of the globe in the jungles of Vietnam impacted everyday life in the United States and influenced various entertainment modes It not only covers the impact of the counterculture revolution popular music about Vietnam recorded while the war was being fought and after and films made immediately following the end of the war in the 1970s but also draws connections to more modern events and popular culture expressions such as films made in the aftermath of September 11 2001 Attention is paid to the impact of social movements like the environmental movement and the civil rights movement and their relationships to the Vietnam War The set will also highlight how the experiences and events of the Vietnam War are still impacting current generations through television shows such as Mad Men **Chemical and Biological Warfare** Eric

Croddy,1997 Covers the history of this form of warfare information on chemical agents themselves as well as regulation controls and disposal policies Scientific research on CBW extending as far back as 1940 is organized under categories of CBW agents and their corresponding subheadings *The Limits of Knowledge* Nancy Arden McHugh,2015-07-16 The Limits of Knowledge provides an understanding of what pragmatist feminist theories look like in practice combining insights from the work of American pragmatist John Dewey concerning experimental inquiry and transaction with arguments for situated knowledge rooted in contemporary feminism Using case studies to demonstrate some of the particular ways that dominant scientific and medical practices fail to meet the health needs of marginalized groups and communities Nancy Arden McHugh shows how transactionally situated approaches are better able to meet the needs of these communities Examples include a community action group fighting environmental injustice in Bayview Hunters Point California one of the most toxic communities in the US gender race age and class biases in the study and diagnosis of endometriosis a critique of Evidence Based Medicine the current effects of Agent Orange on Vietnamese women and children and pediatric treatment of Amish and Mennonite children **Physician's Information for Care of Vietnam Veterans Exposed to Agent Orange and Other Chemicals** Michigan.
