Direct Action and Democracy Today April Carter, 2005-01-14 More and more people around the world are protesting to defend their rights resist injustice or oppose undemocratic rule In this book April Carter debates the nature and meaning of such protest and discusses the relationship between direct action and people s claims for greater democratic control not only against repressive regimes but also in liberal parliamentary states The book begins by looking at non violent direct action in historical context tracing its evolution from the end of the Second World War to the present day It examines the association between direct action and the social movements of recent decades and charts its role in the new global movement against neo liberal economic policies The second part of the book relates direct action to political theory to ascertain how it fits with theories of liberal republican and deliberative democracy It goes on to consider socialist and cosmopolitan approaches to democracy and popular resistance and concludes by looking at the implications of protest politics for current democratic thinking and contemporary world events This book will be a valuable resource for students and scholars of international politics and political theory

Globalisation and Citizenship Wayne Hudson, Steven Slaughter, 2007-04-11 This wide ranging volume explores the impact of globalization upon citizenship with a special focus on the transnational challenges that globalization poses While there is much debate over the concept globalization implies at least two distinct phenomena First it suggests that political economic and social activities are becoming increasingly inter regional or intercontinental in scope Secondly it suggests that there has been an intensification of levels of interaction and interconnectedness between states and societies Citizenship as one of the foundational concepts of the modern liberal democratic states provides the normative framework within which globalization debates may be understood and evaluated It also examines how different concepts theories and practices of citizenship are evolving in response to globalization Central questions explored in this text are How does globalization challenge traditional conceptions of citizenship in specific respects How is globalization creating new citizenships or new civil society spaces How is transnational citizenship developing and what problems are associated with it in specific areas Discussing the theoretical and practical prospects for new forms of liberal republican and cosmopolitan citizenship Globalisation and Citizenship will appeal to students and scholars in the fields of international relations globalization sociology and political science

The Policing of Protest, Disorder and International Terrorism in the UK since 1945 Peter Joyce, 2017-02-06 This book examines the nature of protest and the way in which the police and state respond to the activities associated with this term Protest is explored within the context of the perceived decline in public engagement with recent general election contests It is often thought that protest is regarded as an alternative to or as a replacement for formal political engagement with electoral politics and this book provides a thoughtful assessment of the place of protest in the contemporary conduct of political affairs Analysing key forms of protest such as demonstrations direct action protest conducted within the workplace riots and terrorism this study also illustrates each of

these activities with a wide range of examples of events that have taken place within the UK since 1945 It will be of keen interest to students of criminology criminal justice studies police studies and politics

Cesar Chavez and the Common Sense of Nonviolence José-Antonio Orosco,2008-04-16 Cesar Chavez has long been heralded for his personal practice of nonviolent resistance in struggles against social racial and labor injustices However the works of Gandhi and Martin Luther King Jr have long overshadowed Chavez s contributions to the theory of nonviolence Jos Antonio Orosco seeks to elevate Chavez as an original thinker providing an analysis of what Chavez called the common sense of nonviolence By engaging Chavez in dialogue with a variety of political theorists and philosophers Orosco demonstrates how Chavez developed distinct ideas about nonviolent theory that are timely for dealing with today s social and political issues including racism sexism immigration globalization and political violence

Blood and Progress Nick Hewlett,2016-08-30 Every day we hear about war state repression uprisings suicide bombing gang warfare slavery and domestic abuse Is it realistic to think of a future that is free from violence And can we justify the paradox of violence in pursuit of a peaceful future Nick Hewlett places the goal of a wholly peaceful society centre stage to give us a new understanding of violence in pursuit of peace Hewlett brings together the modern history of capitalist violence and communist violence political thought on insurgent violence a passionate defence of the idea of peace and non violence and the political economy of contemporary capitalism He explores topics ranging from the prospects for peace and non violence to Fidel Castro s ethics of guerrilla warfare and from the brutality of US foreign policy and the violence of historical communism to the meaning of terrorism today Strongly argued and supported by a wealth of facts Blood and Progress is suffused with the profound belief that we need to go beyond the inequalities and injustices of the current age and towards societies characterised by equality deep democracy and peace

Direct Action David Graeber,2009-09-01 A radical anthropologist studies the global justice movement

Civil Disobedience Tony Milligan,2013-03-28 Civil disobedience is a form of protest with a special standing with regards to the law that sets it apart from political violence Such principled law breaking has been witnessed in recent years over climate change economic strife and the treatment of animals Civil disobedience is examined here in the context of contemporary political activism in the light of classic accounts by Thoreau Tolstoy and Gandhi to call for a broader attitude towards what civil disobedience involves The question of violence is discussed arguing that civil disobedience need only be aspirationally non violent and that although some protests do not clearly constitute law breaking they may render people liable to arrest For example while there may not be violence against persons there may be property damage as seen in raids upon animal laboratories Such forms of militancy raise ethical and legal questions Arguing for a less restrictive theory of civil disobedience the book will be a valuable resource for anyone studying social movements and issues of political philosophy social justice and global ethics

Ethical and Political Approaches to Nonhuman Animal Issues Andrew Woodhall,Gabriel Garmendia da Trindade,2017-08-28 This book offers ethical and political approaches to issues that

nonhuman animals face The recent political turn in interspecies ethics from ethical to political approaches has arisen due to the apparent lack of success of the nonhuman animal movement and dissatisfaction with traditional approaches Current works largely present general positions rather than address specific issues and principally rely on mainstream approaches This book offers alternative positions such as cosmopolitan libertarian and left humanist thought as well as applying ethical and political thought to specific issues such as experimentation factory farming nonhuman political agency and intervention Presenting work by theorists and activists insights are offered from both ethics and politics that impact theory and practice and offer essential considerations for those engaging in interspecies ethics within the political turn era **Using Political**

Ideas Barbara Goodwin, 2007-05-07 This book offers a critique of contemporary political ideologies and an analysis of the ideas and concepts which we use in political arguments By revealing the interplay between ideas and ideologies it shows us why political opponents so often seem to argue at cross purposes *What's Your Problem?* Stuart Connor, 2025-02-28 This lively book provides an essential introduction to the critical analysis of social problems and the policy process It argues that policy does not just have an impact of people's lives but that people can and should have an impact on policy Rather than assuming that social policies reflect an inevitable response to pre-existing givens the author adopts a more proactive position to show how a problem is fabricated and how a particular response to a problem is legitimated He goes on to demonstrate how the struggle over the meaning and desirable response to a range of social issues continues to take place not only in Parliament but across broadcast and print media and the numerous internet channels The book provides students practitioners and activists with a rationale for and means to read write and perform policy analysis Drawing on the notion of policy literacy readers will be introduced to a range of resources to enable them to further develop the ability to both read comprehend write create design produce and perform influence and shape policies The book is illustrated throughout with examples from historical and contemporary representations of social problems and local national and global policy making and practice Each section will make reference to a toolkit that tutors student and activists can access to help inform their practice Presented in an accessible format the book demonstrates that making sense of social issues and the policy process also means making sense of some of the fundamental questions values and assumptions of how is should society be organised and our own role in the shaping of society In this way the book not only provides practical and critical insights into the policy process but is also an intellectually challenging and stimulating read **New Genetics, New Social Formations** Peter

Glasner, Paul Atkinson, Helen Greenslade, 2006-12-15 New genetic technologies cut across a range of public regulatory domains and private lifeworlds often appearing to generate an institutional void in response to the complex challenges they pose As a result a number of new social formations are being developed to legitimate public engagement and avoid the perceived democratic deficit that may result Papers in this volume discuss a variety of these manifestations in a global context including genetic data banks committees of inquiry non governmental organisations NGOs national research

laboratories These institutions across both health and agriculture are explored in such diverse locations as Amazonia China Finland Israel the UK and the USA This volume exhibits a clear thematic coherence around the impact of the new genetics and their associated technologies on new social formations and the case studies included have a significant international focus showing a balance between theoretical and empirical approaches in this rapidly changing field This innovative new volume will be of interest to postgraduates and professionals in the fields of sociology social anthropology science and technology studies and environmental studies

The Ethics of Political Dissent Tony Milligan, 2022-07-08 A broadly liberal politics requires political compassion not simply in the sense of compassion for the victims of injustice but also for opponents confronted through political protest and more broadly dissent There are times when out of a sense of compassion a just cause should not be pressed There are times when we need to accommodate the dreadfulness of loss for opponents even when the cause for which they fight is unjust We may also have to come to terms with the irreversibility of historic injustice and reconcile Political compassion of this sort carries risks Pushed too far it may weaken our commitment to justice through too great a sympathy for those on the other side It would be convenient if such compassion could be constrained by a clear set of political principles But principles run the quite different risk of promoting an ossified dissent unable to respond to change In this book Tony Milligan argues that principles are only a limited guide to dissent in unique contingent circumstances They will not tell us how to deal with the truly difficult cases such as the following Should the Lakota celebrate Thanksgiving When is the crossing of a picket line justified What kind of toleration must animal rights advocates cultivate to make progress within a broadly liberal political domain And how should we respond to the entangling of aspiration towards social justice with anger and prejudice such as the anti Zionist discourse We may be tempted to answer these questions by presupposing that alignment the business of choosing sides is ultimately more important than compassion but sometimes political compassion trumps alignment Sometimes being on the right side is not the most important thing

Direct Action and Democratic Politics Robert Benewick, Trevor Smith, 2019-11-19 First published in 1972 Militant protest is not new to British politics but the widespread recourse to direct action in Britain and abroad is unprecedented This book was the first comprehensive examination of contemporary protest in the British context The contributors represented leading agencies of protest as well as those academics who had made this phenomenon their special concern The result is a unique blend of direct experience and objective reflection The first part of the volume covers the theoretical and historical dimensions of protest and is followed by a detailed consideration of specific issues Ulster race the Bomb students and community action An analysis is then made of the reaction of the State to such protest through legislative and administrative channels The final part shows the intermediary roles of political parties MPs the NCCL and the mass media The book concludes with a critical examination of the interaction between protest and representative democracy and the implications which arise from it Students of politics and sociology as well as political activists of all shades of opinion will find this book essential to an

understanding of the bases of protest movements Cosmopolitanism and the Legacies of Dissent Tamara Caraus, Camil Alexandru Parvu, 2014-07-17 The core idea shared by all cosmopolitan views is that all human beings belong to a single community and the ultimate units of moral concern are individual human beings not states or particular forms of human associations Nevertheless the attempts to ground a political theory on overarching universal principles is in contradiction with the plurality of social cultural political religious interpretative standpoints in the contemporary world Is dissent cosmopolitan Is there a legacy of dissent for a theory of cosmopolitanism This book is a comparative historical analysis of dissident thought and practice for contemporary debates on cosmopolitanism Divided into two parts the editors and contributors explore the contribution of paradigmatic dissidents like Gandhi Martin Luther King Havel Sakharov Mandela Liu Xiaobo Aung San Suu Kyi towards a post universalist cosmopolitan theory Part Two examines the inherent cosmopolitanism of the seemingly peripheral dissent of contemporary forms of protests resistance direct action like NO TAV movement and Occupy Wall Street A timely book which allows for a much needed new engagement in contemporary debates of cosmopolitanism we learn how practical resistance to totalizing hegemonic claims is generated and how dissident thinking might contribute to new enriched ways of conceiving the non totalizing foundations of cosmopolitanism An innovative look at what lessons can scholars of cosmopolitanism learn from dissent dissident movements and what the role of dissent in cosmopolitan democracy could be **Agitation with a Smile** Stephen Bird, Adam Silver, Joshua C. Yesnowitz, 2015-11-17 Agitation with a Smile offers a reappraisal of Howard Zinn s political thought and situates his efforts in a contemporary context looking toward the nature of activism and dissent in the future This is the first book to provide a substantive account and assessment of Zinn s philosophy and approach to collective action and to a larger extent democracy The contributors to this book explore the most effective mechanisms by which to arouse public support for seemingly radical positions and how current technological advancements may alter our perception of Zinn s activism The book is a valuable guide to a new generation of activists and scholars of politics in gauging the lasting relevance and legacy of Zinn s ideals concepts and methodology The text is neither fawning nor unduly critical unlike many discussions of Zinn in popular culture Rather the contributors engage the various complexities and tensions present throughout Zinn s work and subject them to contemporary assessment This is a multidisciplinary and international approach to Howard Zinn s intellectual and activist canon

Counter Revanchist Art in the Global City Leah Modigliani, 2023-08-31 Through analyses of public artworks that have taken the form of blockades and barricades since the 1990s this book theorises artists responses to global inequities as cultural manifestations of counter revanchism in diverse urban centres This book is the first to analyse artworks as forms of counter revanchism in the context of the rise of the global city How do artists channel the global spatial conflicts of the 21st century through their behaviours actions and constructions in and on the actually existing conditions of the street What does it mean for artists the very symbol of freedom of personal expression to shut down space To refuse entry To block others

passage The late critical geographer Neil Smith's influential writing on the revanchist city is used as a theoretical frame for understanding how contemporary artists engender the public sphere through their work in public urban spaces Each chapter is a case study that analyses artworks that have taken the form of walls and barricades in China USA UK Ukraine and Mexico In doing so the author draws upon diverse fields including art history geography philosophy political science theatre studies and urban studies to situate the art in a broader context of the humanities with the aim of modelling interdisciplinary research grounded in an ethics of solidarity with global social justice work Collectively these case studies reveal how artists' local responses to urban revanchism since the end of the Cold War are productive reorientations of social relations and harbingers of worlds to come By using plain language and avoiding excessive academic jargon the book is accessible to a wide variety of readers It will appeal to scholars and graduate students in the fields of studio art modern and contemporary art history performance studies visual culture and visual studies especially in relation to those interested in conceptual practices performance art site specificity public art political activism and socially engaged art Cultural geographers and urban theorists interested in the social and political ramifications of temporary and everyday urbanism will also find the analysis of artworks relevant to their own studies

The Lure of the City Austin Williams, Alastair Donald, 2011-09-12 Cities by their very nature are a mass of contradictions They can be at once visually stunning culturally rich exploitative and unforgiving In *The Lure of the City* Austin Williams and Alastair Donald explore the potential of cities to meet the economic social and political challenges of the current age This book seeks to examine the dynamics of urban life showing that new opportunities can be maximised and social advances realised in existing and emerging urban centres The book explores both the planned and organic nature of urban developments and the impacts and aspirations of the people who live and work in them It argues convincingly that the metropolitan mindset is essential to the struggle for human liberation The short accessibly written essays are guaranteed to spark debate across the media and academia about the place of cities and urban life in our ever changing world
