Future Directions in Applied Linguistics Christina Gitsaki, 2011-12-08 The field of applied linguistics covers a diverse range of research and practice and has developed somewhat differently in various parts of the world due to variations in local socio cultural conditions needs and issues However this local diversity does not reflect a field that is incoherent but rather one which has a broad shared international agenda which is invigorated by the diversity brought to the field by local perspectives The papers in this volume represent some of the major global directions that research in applied linguistics is taking and shed light on how language is used to affect practice The aim of this volume is to explore some of the key methods and issues which are guiding applied linguistics into the future through an examination of these issues in local contexts thereby providing a basis for understanding the global directions the field is taking These directions follow two historically defined paths those related to educational studies and language teaching and those related to social issues involving language In the volume half the papers focus on the former examining issues of language teaching language teacher education and second language acquisition while the other half examine social issues related to language use bilingualism and multilingualism and language policy and planning The collection of papers presented in this book illustrates how these traditional themes are influenced by the rising forces of globalisation and the use of technology thus exemplifying both the new and old ways in which the study of language is realised

Davies, 2007-07-12 This second edition of the foundational textbook *An Introduction to Applied Linguistics* provides a state of the art account of contemporary applied linguistics The kinds of language problems of interest to applied linguists are discussed and a distinction drawn between the different research approach taken by theoretical linguists and by applied linguists to what seem to be the same problems Professor Davies describes a variety of projects which illustrate the interests of the field and highlight the marriage it offers between practical experience and theoretical understanding The increasing emphasis of applied linguistics on ethicality is linked to the growth of professionalism and to the concern for accountability manifested in the widening emphasis on critical stances This Davies argues is at its most acute in the tension between giving

advice as the outcome of research and taking political action in order to change a situation which it is claimed needs ameliorisation This dilemma is not confined to applied linguistics and may now be endemic in the applied disciplines *The Gifted Language Learner* Alene Moyer, 2021-06-24 If language learning is self initiated and self regulated can anyone become native like in a new language or are special gifts necessary
