Citizenship Reimagined Allan Colbern,S. Karthick Ramakrishnan,2020-10-22 States have historically led in rights expansion for marginalized populations

and remain leaders today on the rights of undocumented immigrants **Expanding the Human in Human Rights** Brian Gran, 2015-12-03 First Published in 2016 The global struggle for human rights has been fundamentally a struggle by oppressed groups against the structures of their oppression As such sociological work into the experiences of women racial and ethnic minorities children LGBTQ communities the mentally ill and others helps us understand the promises and challenges of pursuing human rights This book presents the fundamental insights gleaned from the scholarship on groups in society for the study of understanding of and ultimately realization of human rights **Caring for America** Eileen Boris, Jennifer Klein, 2015 Caring for America is the definitive history of care work and its surprisingly central role in the American labor movement and class politics from the New Deal to the present Authors Eileen Boris and Jennifer Klein create a narrative of the home care industry that interweaves four histories the evolution of the modern American welfare state the rise of the service sector based labor movement the persistence of race class and gender based inequality and the aging of the American population and considers their impact on today s most dynamic social movements *Men, Masculinities and Disaster* Elaine Enarson, Bob Pease, 2016-06-17 In the examination of gender as a driving force in disasters too little attention has been paid to how women s or men s disaster experiences relate to the wider context of gender inequality or how gender just practice can help prevent disasters or address climate change at a structural level With a foreword from Kenneth Hewitt an afterword from Raewyn Connell and contributions from renowned international experts this book helps address the gap It explores disasters in diverse environmental hazard political and cultural contexts through original research and theoretical reflection building on the under utilized orientation of critical men s studies This body of thought not previously applied in disaster contexts explores how men gain maintain and use power to assert control over women Contributing authors examine the gender terrain of disasters through men s eyes considering how diverse forms of masculinities shape men s efforts to respond to and recover from disasters and other climate challenges The book highlights both the high costs paid by many men in disasters and the consequences of dominant masculinity practices for women and marginalized men It concludes by examining how disaster risk can be reduced through men s diverse efforts to challenge hierarchies around gender sexuality disability age and culture *Troublemakers* Kathryn Schumaker, 2023-01-09 A powerful history of student protests and student rights during the desegregation era In the late 1960s protests led by students roiled high schools across the country As school desegregation finally took place on a wide scale students of color were particularly vocal in contesting the racial discrimination they saw in school policies and practices And yet these young people had no legal right to express dissent at school It was not until 1969 that the Supreme Court would recognize the First Amendment rights of students in the landmark *Tinker v Des Moines* case A series of students rights lawsuits in the desegregation era challenged everything from school curricula to disciplinary policies But in casting students as troublemakers or as culturally deficient school authorities and other experts persuaded the courts to set limits on rights protections that made students of color disproportionately

vulnerable to suspension and expulsion Troublemakers traces the history of black and Chicano student protests from small town Mississippi to metropolitan Denver and beyond showcasing the stories of individual protesters and demonstrating how their actions contributed to the eventual recognition of the constitutional rights of all students Offering a fresh interpretation of this pivotal era Troublemakers shows that when black and Chicano teenagers challenged racial discrimination in American public schools they helped remake American constitutional law and establish protections of free speech due process equal protection and privacy for students

Digital Schools Darrell M. West, 2013-07-15 Nearly a century ago famed educator John Dewey said that if we teach today's students as we taught yesterday's we rob them of tomorrow That wisdom resonates more strongly than ever today and that maxim underlies this insightful look at the present and future of education in the digital age As Darrell West makes clear today's educational institutions must reinvent themselves to engage students successfully and provide them with the skills needed to compete in an increasingly global technological and online world Otherwise the American education system will continue to fall woefully short in its mission to prepare the population to survive and thrive in a rapidly changing world West examines new models of education made possible by enhanced information technology new approaches that will make public education in the post industrial age more relevant efficient and ultimately more productive Innovative pilot programs are popping up all over the nation experimenting with different forms of organization and delivery systems Digital Schools surveys this promising new landscape examining in particular personalized learning realtime student assessment ways to enhance teacher evaluation the untapped potential of distance learning and the ways in which technology can improve the effectiveness of special education and foreign language instruction West illustrates the potential contributions of blogs wikis social media and video games and augmented reality in K 12 and higher education Technology by itself will not remake education But if today's schools combine increased digitization with needed improvements in organization operations and culture we can overcome current barriers produce better results and improve the manner in which schools function And we can get back to teaching for tomorrow rather than for yesterday

Artists of the Possible Matthew Grossmann, 2014 Do policymakers heed the voices of the American public or only the lobbyists in Washington Why do they take action on health reform but not gun control Why does policymaking usually move slowly and sometimes not at all Artists of the Possible takes on these questions analyzing sixty years of domestic policy history to provide a new understanding of what drives policymaking in all three branches of government The results are surprising public policy does not address the public's largest concerns The amount of policy and its liberal or conservative direction emerges instead from coalition building and compromises among political elites Elections public opinion and media coverage have little impact no matter the issue area Even changes in Washington's partisan balance and ideological divides fail to reliably produce shifts in policy direction This data rich exhaustively researched work overturns our most basic assumptions about how policy is made challenging the notion that our government is of by and for the people
