Discours de la méthode René Descartes, André Robinet, 1972 Discours de la méthode is a philosophical and autobiographical treatise published by René Descartes in 1637 It is one of the most influential works in the history of modern philosophy and important to the evolution of natural sciences In this work Descartes tackles the problem of skepticism and modifies it to account for a truth he found to be incontrovertible It is best known as the source of the famous quotation Je pense donc je suis I think therefore I am which occurs in Part IV of the work Here Descartes original French text is reproduced alongside the English translation **Discours de la méthode** René Descartes, 1907 *Regulae ad directionem ingenii / Rules for the Direction of the Natural Intelligence* René Descartes, 2024-01-15 Exactly four hundred years after the birth of René Descartes 1596-1650 the present volume now makes available for the first time in a bilingual philosophical edition prepared especially for English speaking readers his *Regulae ad directionem ingenii* Rules for the Direction of the Natural Intelligence 1619-1628 the Cartesian treatise on method This unique edition contains an improved version of the original Latin text a new English translation intended to be as literal as possible and as liberal as necessary an interpretive essay contextualizing the text historically philologically and philosophically a comprehensive index of Latin terms a key glossary of English equivalents and an extensive bibliography covering all aspects of Descartes methodology Stephen Gaukroger has shown in his authoritative Descartes An Intellectual Biography 1995 that one cannot understand Descartes without understanding the early Descartes But one also cannot understand the early Descartes without understanding the *Regulae* Rules Nor can one understand the *Regulae* Rules without understanding a philosophical edition thereof Therein lies the justification for this project The edition is intended not only for students and teachers of philosophy as well as of related disciplines such as literary and cultural criticism but also for anyone interested in seriously reflecting on the nature expression and exercise of human intelligence What is it How does it manifest itself How does it function How can one make
