**Discovering London's Buildings** John Bold, Tanis Hinchcliffe, 2009 Discovering London's Buildings is an original highly accessible guide to understanding the city's incredibly diverse architecture. Because of the variety, complexity and sheer number of its structures it's far more difficult to get a sense of how London developed than it is with Rome, Paris or New York. This book uses a selective and thematic approach to look at elements of the architecture and the services provided: domestic, commercial, religious and institutional. There are chapters on houses and apartments as well as on offices, churches and government buildings. Other sections focus on schools and railway stations, shops and pubs, buildings for sport and parks. Extensively illustrated and richly informed, the book celebrates both the masterpieces and the mundane, dating from the Middle Ages to the present day. It culminates in 12 themed architectural walks throughout the city, each carefully planned to explore a diverse range of buildings. Approaching Monumentality in Archaeology James F. Osborne, 2014-10-24

Interdisciplinary study of monumental art and architecture in human history. Monumentality is a human phenomenon that has occurred in nearly all times and places. Because of its ubiquity, monumentality is something that has been studied by a large number of disciplines and individuals. Approaching Monumentality in Archaeology explores the phenomenon of monumental art and architecture from humankind's most ancient past to recent history and does so using an interdisciplinary approach that incorporates the research of anthropological archaeologists, art historians, classicists and sociologists working in a wide variety of historical and cultural contexts. The volume seeks to define what is meant by the terms monument and monumentality and to understand the social and political significance of monument building as it has manifested around the world. By advocating for a relational approach to the topic that seeks to find monumentality in the ongoing relationship between object and person, this book offers the opportunity to begin the process of uniting these varied interests into a unified discourse. **Complex City** Jane Manning, Antony Rifkin, Daniel Elsea, Lionel Eid, George Garofalakis, 2020-08-31 Part

story, part atlas, this is a study of a city's complexity. The most successful cities, the most interesting and sought-after ones are those with an intrinsic and distinctive character that remain dynamic and relevant. They are complex and contradictory. And that is worth embracing. This is a visual, geographic and narrative journey that explains why London is the way it is today. Using stunning maps and artful imagery, it makes a compelling case for a finer grain understanding of density through a character-based approach to planning. Each character area is broken down, exploring the characteristics and character-based development potential. For those planning and designing projects, this is a reference book for the early stages of a design project and can help to inform site analyses which form the part of most architectural commissions and urban design studies. For lovers of maps and London, it is a must-read. **City Tourism** Robert Maitland, Brent W.
