**Food and Cooking Skills Education** Anita Tull, 2018-01-29 Food and Cooking Skills Education FCSE is a complex mix of policy and practicality educational theory and pedagogy classroom and government policy This book shows how FCSE has been at the centre of a tussle between education and policy for decades It reviews how FCSE has grappled with various significant issues of concern that threaten to marginalise it and pose problems for educational practicalities as expectations are increased but resources are squeezed It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready made food has become commonplace and public knowledge of where our food comes from is noticeably lacking This has contributed to the escalating incidence of diet related diseases and the attendant cost to society and threatened environmental sustainability In turn governments have reacted by proposals to make practical cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs Based on detailed research conducted across England and Wales as well as comparisons with thirty five other countries or states the author makes recommendations for policy to manage this challenge facing contemporary society Business Studies

**Trauma- and Stressor-Related Disorders** Frederick J. Stoddard Jr., David M. Benedek, Mohammed R. Milad, Robert J. Ursano, 2018-05-04  
Trauma stress and manmade and natural disasters are increasingly impacting individuals and communities. The clinical and scientific advances presented here strive to address the rapidly expanding individual and community burden of disease resulting from the experience of traumatic or stressful events. The authors describe the suffering which trauma and stressor related disorders (TSRDs) cause and explain in 30 concise chapters the state of the science for the DSM 5 trauma and stressor related disorders with regard to pathogenesis, diagnostic assessment and approach to treatment. This volume presents the genetic, neurochemical, developmental and psychological foundations and epidemiology of the trauma and stressor related disorders in addition to specific guidance on screening and evaluation, diagnosis, prevention and biological, psychological and social treatments. The chapters in this book cover a variety of TSRDs: posttraumatic stress disorder, acute stress disorder, adjustment disorders, persistent complex bereavement disorder and reactive attachment and disinhibited social engagement disorders. Graphics including neuroimaging are integrated for easy reference and to aid grasping of key concepts. The book draws on the current literature and provides brief case scenarios from individuals and families exposed to psychological or physical traumas including mass trauma events. Factors contributing to susceptibility to these disorders and to resilience are also addressed. *Trauma and Stressor Related Disorders* provides an in depth yet succinct introduction to current clinical and research knowledge for trainees and for professionals including psychotherapeutic, psychopharmacological, public health and policy interventions. It addresses the level of evidence for different best practices to target the disabling cognitive, emotional or behavioral symptoms for a specific patient or population.

**Homeland Security and Criminal Justice** Everette B. Penn, 2013-10-18  
No event has shaped international events of recent years more than the terrorist attacks of September 11, 2001. Tragically, less than four years later, Hurricane Katrina devastated the Gulf Coast. In less than five years, the United States has experienced its worst terrorist attack and worst natural disaster both in terms of the number of lives lost and in the costs needed for reconstruction. Both events have clearly indicated that there are tremendous threats to the security and well being of Americans in their own country. Furthermore, these events have demonstrated the importance of criminal justice agencies who are the first responders to threats to the United States. Since the threats of further terrorist attacks, natural disasters, epidemics and cybercrime continue to lurk as potential dangers to the United States, homeland and the American Criminal Justice System must be committed to mitigating, preparing for, responding to and recovering from these tragic events. In addition, its commitment must be steadfast and ubiquitous. This highly topical book analyzes the nexus of homeland security to the discipline of criminal justice by addressing in depth issues and challenges facing criminal justice students, practitioners and faculty in the

burgeoning field of homeland security This book was previously published as a special issue of Criminal Justice Studies
