Personalized Human-Computer Interaction Mirjam Augstein, Eelco Herder, Wolfgang Wörndl, 2023-08-07 Personalized and adaptive systems employ user models to adapt content services interaction or navigation to individual users needs User models can be inferred from implicitly observed information such as the user's interaction history or current location or from explicitly entered information such as user profile data or ratings Applications of personalization include item recommendation location based services learning assistance and the tailored selection of interaction modalities With the transition from desktop computers to mobile devices and ubiquitous environments the need for adapting to changing contexts is even more important However this also poses new challenges concerning privacy issues user control transparency and explainability In addition user experience and other human factors are becoming increasingly important This book describes foundations of user modeling discusses user interaction as a basis for adaptivity and showcases several personalization approaches in a variety of domains including music recommendation tourism and accessible user interfaces

Transdisciplinary Digital Art Randy Adams, Steve Gibson, Stefan Müller Arisona, 2008-05-05 This volume collects selected papers from the past two instances of Digital Art Weeks Zurich Switzerland and Interactive Futures Victoria BC Canada two parallel festivals of digital media art The work represented in Transdisciplinary Digital Art is a confirmation of the vitality and breadth of the digital arts Collecting essays that broadly encompass the digital arts Transdisciplinary Digital Art gives a clear overview of the on going strength of scientific philosophical aesthetic and artistic research that makes digital art perhaps the

defining medium of the 21st Century *Music-in-Action* Tia DeNora, 2017-07-05 This volume brings together DeNora's work published between 1986 and 2007. It includes thirteen essays some of which have had a major impact on the field. The chapters trace the development of her work from its early concern with musical meaning, historical ethnography and the everyday perspective to its current focus on music in action. Topics covered include Adorno on Schoenberg and Stravinsky, a theory of music as a space and place for interpretive work, research methods for historical musicology and the first key statement of her theory of music as an active ingredient in social life. These building blocks are then employed to investigate music and embodied experience, sexuality and gender differentiation and music's role as a technology of health. The essays are set in a multi-disciplinary context with an autobiographical introduction.

Fieldwork for Design David Randall, Richard Harper, Mark Rouncefield, 2007-04-24 This book looks at why ethnographic approaches have been turned to in the design of computing devices for the workplace, for the home and elsewhere. It presents a history of ethnography both as it was practiced before computer science picked it up and since, most especially in the CSCW and HCI domains. It examines further the various ethnographic or fieldwork frameworks currently popular, explaining and examining what each claims and entails. The focus of the book throughout is on the practical relationship between theory and practice, a relationship that is often misunderstood yet fundamental to successful design. The book is illustrated with real examples from the authors' various experiences in academic and commercial settings, reporting on the use of ethnography before, during and after design innovation and implementation. The result is a book that provides the working knowledge necessary for using any kind of ethnographic approach in the design of computer technologies.

Design for Behaviour Change Kristina Niedderer, Stephen Clune, Geke Ludden, 2017-08-23 Design impacts every part of our lives. The design of products and services influences the way we go about our daily activities and it is hard to imagine any activity in our daily lives that is not dependent on design in some capacity. Clothing, mobile phones, computers, cars, tools and kitchenware all enable and hold in place everyday practices. Despite design's omnipresence, the understanding of how design may facilitate desirable behaviours is still fragmented with limited frameworks and examples of how design can effect change in professional and public contexts. This text presents an overview of current approaches dedicated to understanding how design may be used intentionally to make changes to improve a range of problematic social and environmental issues. It offers a cross-disciplinary and cross-sectoral overview of different academic theories adopted and applied to design for behaviour change. The aim of the volume is twofold: firstly to provide an overview of existing design models that integrate theories of change from differing scientific backgrounds; secondly to offer an overview of application of key design for behaviour change approaches as used across case studies in different sectors such as design for health and wellbeing, sustainability, safety design against crime and social design. *Design for Behaviour Change* will appeal to designers, design students and practitioners of behavioural change.
