national regional and global levels Within historically specific social conditions and contexts of the everyday the chapters seek to provide a diversity of experiences and understandings of the place of the media in different Asian locations This book considers the emerging consequences of media consumption in people s everyday life at a time when the political socio economic and cultural forces by which the media operate are rapidly globalizing in Asia Critiques of Everyday Life Michael Gardiner,2002-01-04 Recent years have witnessed a burgeoning interest in the study of everyday life within the social sciences and humanities In Critiques of Everyday Life Michael Gardiner proposes that there exists a counter tradition within everyday life theorising This counter tradition has sought not merely to describe lived experience but to transform it by elevating our understanding of the everyday to the status of a critical knowledge In his analysis Gardiner engages with the work of a number of significant theorists and approaches that have been marginalized by mainstream academe including The French tradition of everyday life theorising from the surrealists to Henri Lefebvre and from the Situationist International to Michel de Certeau Agnes Heller and the relationship between the everyday rationality and ethics Carnival prosaics and intersubjectivity in the work of Mikhail Bakhtin Dorothy E Smith s feminist perspective on everyday life Critiques of Everyday Life demonstrates the importance of an alternative multidisciplinary everyday life paradigm and offers a myriad of new possibilities for critical social and cultural theorising and empirical research Urban Culture in Tehran Seyed Hossein Iradj Moeini,Mehran Arefian,Bahador Kashani,Golnar Abbasi,2017-11-27 This book studies the production of urban culture in Tehran after 1979 It analyzes urban resistance and urban processes in underground cultural spaces bookshops cafes and art galleries The intended audience is architects and urban planners interested in socio political aspects of bottom up space formation but also those in humanities and particularly cultural studies The idea of the book reflects architectural criticism and bottom up processes of space formation It analyzes alternative non official ways of forming cultural spaces in Tehran and the way they resist formally endorsed culture Caf s bookshops and galleries each take various and different sets of strategies to constitute their territory and their communities within the city From temporarily occupying street corners booksellers to constitution of an underground network of unfixed meeting points to using the modern paradigms of ownership and the idea of private property primarily as a political tool for management to claim a safe alternative sphere of art and finally to semiotic spatial codifications of spaces to make them as a safe gathering places taking food as a means All these three cultural spaces deal with various conditions to form specific forms of resistance practices throughout processes that leave their spatial traces on the city **International Encyclopedia of Human Geography** ,2009-07-16 The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent and related subject areas The encyclopedia includes over 1 000 detailed entries on philosophy and theory key concepts methods and practices biographies of notable geographers and geographical thought and praxis in different parts of the world This groundbreaking project covers every field of human geography and the discipline s
