Space as Storyteller Laura Chiesa, 2016-07-15 Walter Benjamin's Arcades Project suggests that space can become a storyteller if so plenty of fleeting stories can be read in the space of modernity where repetition and the unexpected cross pollinate In *Space as Storyteller* Laura Chiesa explores several stories across a wide range of time that narrate spatial jumps from Benjamin's tangential take on the cityscape the experimentalism of Futurist theatricality the multiple and potential atlases narrated by Italo Calvino and Georges Perec and the posturban thought and practice of Bernard Tschumi and Rem Koolhaas OMA *Space as Storyteller* diverts attention from isolated disciplines and historical or geographical contexts toward transdisciplinary encounters that mobilize the potential to invent new spaces of comparison a potential the author describes as architecturability

In the Land of the Patriarchs Noam Shokeid, 2023-09-19 2024 On The Brinck Book Award and Lecture Series University of New Mexico 2024 PROSE Award Architecture Urban Planning Association of American Publishers An on the ground account of the design and evolution of West Bank settlements showing how one of the world's most contested landscapes was produced by unexpected conflicts and collaborations among widely divergent actors Since capturing the West Bank in 1967 Israel has overseen the construction of scores of settlements across the territory's rocky hilltops The settlements are part of a fierce political conflict But they are not just hotly contested political ventures They are also something more everyday residential architectural projects *In the Land of the Patriarchs* is an on the ground account of the design and evolution of West Bank

settlements Noam Shoked shows how settlements have been shaped not only by the decisions of military generals high profile politicians and prominent architects but also by a wide range of actors including real estate developers environmental consultants amateur archeologists and Israelis who feel unserved by the country's housing system The patterns of design and construction they have inspired reflect competing worldviews and aesthetic visions as well as everyday practices not typically associated with the politics of the Israeli occupation Revealing the pragmatic choices and contingent circumstances that drive what appears to be a deliberately ideological landscape Shoked demonstrates how unpredictable the transformation of political passion into brick and mortar can be

Architecture and the Image at the Turn of the 21st Century Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture's far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies

and business **The Globalisation of Modern Architecture** Robert Adam, 2012-04-25 Taking the break up of the Soviet Union and the entry of Russia China and India into the global market as the start of a new era of globalisation Robert Adam compares new developments in architecture and urban design with major shifts in the balance of power since 1990 Based on the principle that design unavoidably follows social change politics and economics this analysis casts a new light on recent architecture Starting with the lead up to events in the 1990s links are established between the global dominance of the North Atlantic economies architectural style and a dramatic increase in international architectural practice The widely observed homogeneity of the global consumer economy is examined in relation to branding tourism and international competition between cities and parallels are drawn with universal architectural and urban types iconic architecture and the rise of the star architect Contrasting pressures to maintain differences are identified in the break up of nation states identity politics targeted marketing and environmentalism and these are related to attempts to reinforce local identity through architecture and urban design Using social political and economic change as a guide to new directions in architecture and urban design the book ends by tracing the changes in global power revealed by the 2008 Western financial crash and its immediate impact on the built environment By comparing past patterns of cultural influence the book speculates on how architecture and urban design may come to reflect wider global trends **The Complex City: Social and Built Approaches and Methods**

Caroline Donnellan, 2022-10-31 The Complex City Social and Built Approaches and Methods explores different ways of understanding the city The social city approach proceeds from the ground up it focuses on human interactions shaped by economic and environmental processes The built city method looks through a top down lens examining policy and planning for buildings and infrastructure including utilities and energy networks This volume is different from other city anthologies in that it explores them through their differences by presenting each chapter in one of the two categories While there is invariably an overlap between the two areas they are distinct positions In doing so the book identifies how despite their often adversarial approaches they both belong to the same city As essential components of the city they should not necessarily be resolved as it is in this friction where creativity and innovation happens The Complex City Social and Built Approaches and Methods is concerned about the ideas and solutions that they both offer The book's originality stems from this duality and from its recognition that cities are living organic protean places of opportunity crisis conflict and challenge The chapters demonstrate the complexity of cities as a set of ideas concerning what they engender how they function and why they continue to act as a catalyst for different kinds of human activity They explore issues of socio political import and questions of the city as a physically constructed space The themes are diverse and include the inception of the city as a place of competition to centres of regeneration and urban withdrawal They cover a range of city and urban regions from Athens to Wellington from site specific singular perspectives to comparative assessments The questions they raise include how do we inhabit urban areas how do we make plans for them and how do we at times ignore them entirely The Age of Spectacle

Tom Dyckhoff, 2017-04-20 A great storyteller you would be hard pushed to find a more knowledgeable or entertaining guide Icon Such an interesting book I cannot recommend it enough Lauren Laverne In Dubai a luxury apartment block is built in the shape of a giant iPod In China President Xi Jinping denounces the trend of constructing bizarre new buildings in wacky shapes and colours In Cincinnati celebrity architect Zaha Hadid is paid millions to design a single iconic structure with the hope of single handedly transforming the region's ailing fortunes These incidents are all part of the same story the rise of the age of spectacle Over the last fifty years there has been a revolution in how our cities operate In *The Age of Spectacle* Tom Dyckhoff tells the story of how architecture became obsessed with the flashy the monumental and the ostentatious and how we all have to live with the consequences Exploring cityscapes from New York to Beijing and from Bilbao to Portsmouth Dyckhoff shows that we are not just witnessing a new kind of building we are living through a fundamental transformation in how our urban spaces work The corporate explosion of the last few decades has fundamentally shifted the relationship between architects politicians and cities inhabitants fostering innovative new kinds of engineering and design but also facilitating ill conceived vanity projects and commercial power grabs Timely passionate and bursting with new ideas *The Age of Spectacle* is both an examination of how twenty first century cities work and a manifesto for a radically new kind of urbanism Our cities Dyckhoff shows can thrive in the age of spectacle but only if they engage us not just with dazzling structures but by responding to the needs of the people who inhabit them Engaging The iconic building is the most obvious architectural phenomenon of our age yet somehow no one has quite done what Tom Dyckhoff does with *The Age of Spectacle* which is to tell its story clearly and plainly Rowan Moore Observer First class Finally a book that nails the iconic movement Tom Dyckhoff's *The Age of Spectacle* is the book that I wish I had written Simon Jenkins Unusually accessible and well argued Evening Standard

Transnationalism and the German City J. Diefendorf, J. Ward, 2014-04-24 Too often scholars treat transnationalism as a conflict in which the local regional and national give way to globalized identity As these varied studies of German cities show though the urban environment is actually a site of trans localism that is not merely oppositional but that adapts itself dialectically to the forces of globalization

Utopia and Reality Simon Spiegel, Andrea Reiter, Marcy Goldberg, 2020-02-15 Scholarship on utopias in film has so far focused exclusively on dystopias but utopias are about criticizing the present rather than telling a gripping story *Utopia and Reality* looks into propaganda and documentary films for depictions of better worlds This volume brings together researchers from two fields that have so far seen little exchange documentary studies and utopian scholarship Covers a wide range of films from Soviet avant garde to propaganda videos for the terror organisation ISIS and from political activist to ecofeminist and interactive documentaries

Tower to Tower Henriette Steiner, Kristin Veel, 2024-05-21 A cultural history of gigantism in architecture and digital culture from the Eiffel Tower to the World Trade Center The gigantic is everywhere and gigantism is manifest in everything from excessively tall skyscrapers to globe spanning digital networks In this book Henriette Steiner and Kristin Veel map and critique the

trajectory of gigantism in architecture and digital culture the convergence of tall buildings and networked infrastructures from the Eiffel Tower to One World Trade Center They show how these two forms of gigantism intersect in the figure of the skyscraper with a transmitting antenna on its roof a gigantic building that is also a nodal point in a gigantic digital infrastructure Steiner and Veel focus on two paradigmatic tower sites the Eiffel Tower and the Twin Towers of the destroyed World Trade Center as well as their replacement the One World Trade Center tower They consider among other things philosophical interpretations of the Eiffel Tower the design and destruction of the Twin Towers the architectural debates surrounding the erection of One World Trade Center on the Ground Zero site and such recent examples of gigantism across architecture and digital culture as Rem Koolhaas's headquarters for China Central TV and the phenomenon of the tech giant Examining the cultural architectural and media history of these towers they analyze the changing conceptions of the gigantism that they represent not just as physical structures but as sites for the projection of cultural ideas and ideals

Architektur zwischen »Drinnen« und »Draußen« Gerhard Schnabl, 2014-03-15 Metropolitane Spannungsfelder zwischen Stadt und Hochhaus ausgehend vom Beginn des 20. Christian Dior and Emilio Pucci designers and brands like Tommy Hilfiger Ralph Lauren Vivienne Westwood Franco Moschino Dolce and street style brands including Mambo Vans Eastpak Gsus Nigo Stussy and Ipath Irony and identity are the driving forces behind the multiple ways in which the flags of the United States Great Britain and Italy have been appropriated Fashion also has a place for the colors of Brazil Jamaica and Japan red flags rainbow flags and flags that have no country The book traverses this explosion of colourful symbols to present the creative processes of a fashion in close contact with cinema art design and music
