Contesting Earth's Future Radical Ecology And Postmodernity:

Contesting Earth's Future Michael E. Zimmerman, 1997 **Contesting Earth's Future** Michael E.

Zimmerman, 1997-04 Radical ecology typically brings to mind media images of ecological activists standing before loggers saws staging anti nuclear marches and confronting polluters on the high seas Yet for more than twenty years the activities of organizations such as the Greens and Earth First have been influenced by a diverse less publicized group of radical ecological philosophers It is their work the philosophical underpinnings of the radical ecological movement that is the subject of *Contesting Earth's Future* The book offers a much needed balanced appraisal of radical ecology's principles goals and limitations Michael Zimmerman critically examines the movement's three major branches deep ecology social ecology and ecofeminism He also situates radical ecology within the complex cultural and political terrain of the late twentieth century showing its relation to Martin Heidegger's anti technological thought 1960s counterculturalism and contemporary theories of poststructuralism and postmodernity An early and influential ecological thinker Zimmerman is uniquely qualified to provide a broad overview of radical environmentalism and delineate its various schools of thought He clearly describes their defining arguments and internecine disputes among them the charge that deep ecology is an anti modern proto fascist ideology Reflecting both the movement's promise and its dangers this book is essential reading for all those concerned with the worldwide ecological crisis *Heidegger and Politics* Alexander S. Duff, 2015-11-19 In this fresh interpretation of Heidegger Alexander S Duff explains Heidegger's perplexing and highly varied political influence Heidegger and Politics argues that Heidegger's political import is forecast by fundamental ambiguities about the status of politics in his thought Duff explores how in *Being and Time* as well as earlier and later works Heidegger analyzes everyday human existence as both irretrievably banal but also supplying our only tenuous path to the deepest questions about human life Heidegger thus points to two irreconcilable attitudes toward politics either a total and purifying revolution must usher in an authentic communal existence or else we must await a future deliverance from the present dispensation of Being Neither attitude is conducive to moderate politics and so Heidegger's influence tends towards extremism of one form or another modified only by explicit departures from his thought *Earthcare* David Clowney, Patricia Mosto, 2009-11-16 This anthology designed for use in undergraduate courses in environmental ethics includes new and classic readings by leading writers in the field full length case studies and many short discussion cases Introductions and discussion questions are provided for all the essays with each chapter introduced by a summary of the issues and appropriate philosophic historical and scientific background Exploring ethical theory environmental ethics science and the environmental movement Earthcare also offers suggestions for students on how to think about ethics and the environment Through many worldviews religions and philosophical perspectives this collection grapples with environmental ethics issues from valuing nature concerns about the atmosphere water land animals and human population as well as the interlocking and often problematic interests of business consumption energy and

sustainability This book also features examples of a wide variety of environmentally engaged individuals giving students a way of seeing the connections between the material studied and what they themselves might accomplish

Postmodern Climate Change Leigh Glover, 2007-01-24 A much needed analysis of international climate change politics as a key issue of modernity and in the context of environmentalism Leigh Glover presents a new way to understand the climate change problem and is concerned with problems of modernity and postmodernity in the context of contemporary environmental thought Focusing on the international politics surrounding the UN agreement of climate change the Framework Convention on Climate Change and its Kyoto Protocol Glover examines the issue using the key aspects of climate change science global environmental politics and global environmental management

The Eco poetics of Entanglement in Contemporary Turkish and American Literatures Meliz Ergin, 2017-10-11 This book foregrounds entanglement as a guiding concept in Derrida's work and considers its implications and benefits for ecocritical thought Ergin introduces the notion of ecological text to emphasize textuality as a form of entanglement that proves useful in thinking about ecological interdependence and uncertainty She brings deconstruction into a dialogue with social ecology and new materialism outlining entanglements in three strands of thought to demonstrate the relevance of this concept in theoretical terms Ergin then investigates natural social entanglements through a comparative analysis of the works of the American poet Juliana Spahr and the Turkish writer Latife Tekin The book enriches our understanding of complicity and accountability by revealing the ecological network of material and discursive forces in which we are deeply embedded It makes a significant contribution to current debates on ecocritical theory comparative literature and eco poetics

The Ecological Community Roger S. Gottlieb, 2014-01-02 The Ecological Community offers important and previously unexplored responses to the environmental crisis The premise of this volume writes editor Roger Gottlieb is that the environmental crisis challenges the presuppositions of and creates a rich field of creative work in philosophy politics and moral theory These eighteen essays are fresh and compelling interrogations of the existing wisdom in a host of areas including liberalism communicative ethics rights theory and environmental philosophy itself Contributors Avner de Shalit Gus diZerega Roger S Gottlieb Eric Katz Robert Kirkman Andrew Light Brian Luke David Macauley Mark A Michael Carl Mitcham John O'Neill Holmes Rolston III David Schlosberg William Throop Steven Vogel Mark I Wallace Peter S Wenz Michael E Zimmerman

Rethinking Nature Bruce V. Foltz, Robert Frodeman, 2004-11-02 Rethinking Nature brings the voices of leading Continental philosophers into discussion about what is emerging as one of our most pressing and timely concerns the environmental crisis facing our planet The essays featured in this volume embrace environmental philosophy in its broadest sense and include topics such as environmental ethics environmental aesthetics ontology theology gender and the environment and the role of science and technology in forming knowledge about our world Here philosophy goes out into the field and comes back with rich insights and new approaches to environmental problems This far reaching and lively volume affords firm ground for thinking about the multiple ways that humans engage nature

Nature Peter Coates, 2013-04-26 Nature is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational perspective or cross the divides between historical eras A distinctive unifying theme is Coates's interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge Nature provides the reader with an accessible synthesis and introduction to some of environmental history's central features and debates confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues

Finding God in the Singing River Mark I. Wallace, 2005-03-04 We live in an age of vast and rapid destruction of habitats and species Yet Christianity holds great potential for healing this situation Indeed the Bible and Christian tradition are a treasure trove of rich images and stories about God as an earthen being who sustains the natural world with compassion and thereby models for humankind environmentally healthy ways of being Mark Wallace's stimulating book retrieves a central but often neglected biblical theme the idea of God as carnal Spirit who indwells all things as the basis for constructing a green spirituality responsive to the environmental needs of our time In the biblical tradition he writes God as Spirit is an ecological presence that shows itself to us daily by living in and through the earth One message of Christianity therefore is celebration of the bodily material world ancient redwoods vernal springs broad winged hawks everyday pigweed as the place that God indwells and cares for in order to maintain the well being of our common planetary home Alongside his green reading of the Bible and tradition Wallace employs the resources of deep ecology Neopagan spirituality and the environmental justice movement to rethink Christianity as an earth based body loving religion He also analyzes color images reproduced in the book Wallace's bold yet careful work reawakens our sense of the sacrality of the earth and the life that the trinitarian God creates there It also grounds the impulses of New Age spirituality in a profoundly biblical notion of God's being and activity

Ethics without Self, Dharma without Atman Gordon F. Davis, 2018-07-18 This volume of essays offers direct comparisons of historic

Western and Buddhist perspectives on ethics and metaphysics tracing parallels and contrasts all the way from Plato to the Stoics Spinoza to Hume and Schopenhauer through to contemporary ethicists such as Arne Naess Charles Taylor and Derek Parfit It compares and contrasts each Western philosopher with a particular strand in the Buddhist tradition in some chapters represented by individual writers such as Nagarjuna Vasubandhu Santideva or Tsong Khapa It does so in light of both analytic concerns and themes from the existentialist and phenomenological traditions and often in an ecumenical spirit that bridges both analytic and continentalist approaches Some of the deepest questions in ethics dealing with the scope of agency value laden notions of personhood and the nature of value in general are intertwined with questions in metaphysics One set of questions addresses how varying conceptions of selfhood relate to moral values e g the concern of self or selves for the well being of others another set of questions addresses how a conception of oneself or one's selves should or should not affect how one thinks of happiness or eudaimonia or in classical Indian terms artha sukha or nirvana Western philosophy has featured discussion of both but some would argue that certain traditions of Asian philosophy have offered a more sustained and even treatment of both sets of questions The Buddhist tradition in particular has not only featured much discussion on both fronts but has attracted many contemporary philosophers to its distinctive spectrum of approaches and to what is from many Western points of view a seemingly subversive analysis of ego selfhood and personhood whether in metaphysical phenomenological or other incarnations

Spaces of Mobility Sigurd Bergmann, Thomas A. Hoff, Tore Sager, 2014-12-18 Human mobility is dramatically on the rise globalization and modern technology have increased transportation and migration Frequent journeys over large distances cause huge energy consumption severely impact local and global natural environments and raise spiritual and ethical questions about our place in the world *Spaces of Mobility* presents an analysis of the socio political environmental and ethical aspects of mobility The volume brings together essays that examine why and how modern modes of transport emerge considering their effect on society The religious significance of contemporary travel is outlined namely its impact on pilgrimage Christology and ethics The essays examine the interaction between humans and their surroundings and question how increased mobility affects human identity and self understanding *Spaces of Mobility* will be of interest to students and scholars seeking to understand the impact of mobility on modern culture and society the ethics behind contemporary transport systems and the conditions of immigrants in a world of constant travel

The World's Fearlessness Teachings R. Michael Fisher, 2010 *The World's Fearlessness Teachings* addresses the human fear problem in a truly unique and insightful way summarizing the teaching on fearlessness from around the world and throughout history The author then utilizes critical integral theory à la Wilber as an approach to categorize the developmental and evolutionary spectrum of fear management systems known thus far The author has spent twenty years researching the timely topic of fear and how to best manage and transform it From this experience he offers an educational healing vision to address the challenges of a dangerous 21st century Fear's empire has taken rule It is time to

resist it using the best intelligence from both sacred and secular traditions as well as the transformational theories humanity has to offer R Michael Fisher maps out ten fear management systems that will benefit future positive leaders everywhere

Book jacket **Prolegomena to a Carnal Hermeneutics** Hwa Yol Jung, 2014-08-14 Prolegomena to a Carnal Hermeneutics introduces the importance of body politics from both Eastern and Western perspectives Hwa Yol Jung begins with Giambattista Vico's anti Cartesianism as the birth of the discipline He then explores the homecoming of Greek mousike performing arts which included oral poetry dance drama and music Mikhail Bakhtin's dialogical body politics the making of body politics in Hannah Arendt Emmanuel Levinas and Luce Irigaray Marshall McLuhan's transversal and embodied philosophy of communication and transversal geophilosophy This tour de force will be an engaging read for anyone interested in the above thinkers as well as for students and scholars of comparative philosophy communication theory environmental philosophy political philosophy or continental philosophy Environment and Social Theory John Barry, 2007-01-24 Written in an engaging and accessible manner by one of the leading scholars in his field Environment and Social Theory completed revised and updated with two new chapters is an indispensable guide to the way in which the environment and social theory relate to one another This popular text outlines the complex interlinking of the environment nature and social theory from ancient and pre modern thinking to contemporary social theorizing John Barry examines the ways major religions such as Judaeo Christianity have and continue to conceptualize the environment analyzes the way the non human environment features in Western thinking from Marx and Darwin to Freud and Horkheimer explores the relationship between gender and the environment postmodernism and risk society schools of thought and the contemporary ideology of orthodox economic thinking in social theorising about the environment How humans value use and think about the environment is an increasingly central and important aspect of recent social theory It has become clear that the present generation is faced with a series of unique environmental dilemmas largely unprecedented in human history With summary points illustrative examples glossary and further reading sections this invaluable resource will benefit anyone with an interest in environmentalism politics sociology geography development studies and environmental and ecological economics

The Philosophical Roots of the Ecological Crisis Joshtrom Isaac Kureethadam, 2018-06-11 The Philosophical Roots of the Ecological Crisis Descartes and the Modern Worldview traces the conceptual sources of the present environmental degradation within the worldview of Modernity and particularly within the thought of Ren Descartes universally acclaimed as the father of modern philosophy The book demonstrates how the triple foundations of the Modern worldview in terms of an exaggerated anthropocentrism a mechanistic conception of the natural world and the metaphysical dualism between humanity and the rest of the physical world can all be largely traced back to Cartesian thought with direct ecological consequences *Negotiating Postmodernism* Wayne Gabardi, 2001 Joining the modern postmodern debate this book suggests that the polarizing polemics of the radical postmodernists who once dominated the discussion have given way to a

new critical postmodernism characterized by dialogue accommodation and synthesis A comprehensive survey Negotiating Postmodernism also marks the arrival of a powerful critical presence on the scene one that advances the idea of a late modern postmodern social and cultural transition *A New Environmental Ethics* Holmes Rolston III, 2012-04-23 No one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises Now more than a decade into the next century no one can ignore it A New Environmental Ethics the Next Millennium for Life on Earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment Rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics This book however is not simply a judicious overview Instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future As a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for *Environmentalism* David Peterson Del Mar, 2014-06-06 Why are our environmental problems still growing despite a huge increase in global conservation efforts Peterson del Mar untangles this paradox by showing how prosperity is essential to environmentalism Industrialization drove people to look for meaning in nature even as they consumed its products more relentlessly Hence England led the way in both manufacturing and preserving its countryside and the United States created a matchless set of national parks as it became the world's pre eminent economic and military power Environmental movements have produced some impressive results including cleaner air and the preservation of selected species and places But agendas that challenged western prosperity and comfort seldom made much progress and many radical environmentalists have been unabashed utopianists Environmentalism considers a wide range of conservation and preservation movements and less organized forms of nature loving from seaside vacations to ecotourism to argue that these activities have commonly distracted us from the hard work of creating a sustainable and sensible relationship with the environment Perfecting Human Futures J. Benjamin Hurlbut, Hava Tirosh-Samuelson, 2016-02-22 Humans have always imagined better futures From the desire to overcome death to the aspiration to dominion over the world imaginations of the technological future reveal the commitments values and norms of those who construct them Today the human future is thrown into question by emerging technologies that promise radical control over human life and elicit corollary imaginations of human perfectibility This interdisciplinary volume assembles scholars of science and technology studies sociology philosophy theology ethics and history to examine imaginations of technological progress that promises to transcend the constraints of human body and being Attending in particular to transhumanist and posthumanist visions the volume breaks new ground by exploring their utopian and eschatological dimensions and situating them within a broader context of ideas

institutions and practices of innovation The volume invites specialists and general readers to explore the stakes of contemporary imaginations of technological innovation as a source of progress a force of social and historical transformation and as the defining essence of human life
