The Anthropology of Hunter-Gatherers Vicki Cummings, 2020-07-12 This book provides a basic introduction to key debates in the study of hunter gatherers specifically from an anthropological perspective but designed for an archaeological audience Hunter gatherers have been the focus of intense anthropological research and discussion over the last hundred years and as such there is an enormous literature on communities all over the world Yet among the diverse range of peoples studied there are a number of recurrent themes including not only the way in which people make a living hunting gathering and fishing but also striking similarities in other areas of life such as belief systems and social organisation These themes are described and then explored through archaeological case studies The overarching theme throughout the volume is the use of ethnographic analogy and how archaeologists should be critical in its use

Population and Demography Stephen Shennan, 2017-12-04 Covers recent work on the cultural aspects of past societies focusing especially on studies of colonisation and migration and the impact of population growth The Palaeolithic Origins of Human Burial Paul Pettitt, 2010-12-20 Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age The Palaeolithic Origins of Human Burial takes a novel approach to the long term development of human mortuary activity the various ways we deal with the dead and with dead bodies It is the first comprehensive survey of Palaeolithic mortuary activity in the English language Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify core areas of behaviour towards the dead that probably have very deep evolutionary antiquity From that point the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed The core chapters of the book survey the mortuary activities of early hominins archaic members of the genus Homo early Homo sapiens the Neanderthals the Early and Mid Upper Palaeolithic and the Late Upper Palaeolithic world Burial is a striking component of Palaeolithic mortuary activity although existing examples are odd and this probably does not reflect what modern societies believe burial to be and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene When did symbolic aspects of mortuary ritual evolve When did the dead themselves become symbols In discussing such questions The Palaeolithic Origins of Human Burial offers an engaging contribution to the debate on modern human origins It is illustrated throughout includes up to date examples from the Lower to Late Upper Palaeolithic including information hitherto unpublished On the Road of the Winds Patrick Vinton Kirch, 2017-11-14 Introduction defining Oceania Discovering the Oceanic past The Pacific islands as a human environment Sahul and the prehistory of old Melanesia Lapita and the

Exploring Methods of Faunal Analysis Michael Glassow, Terry L. Joslin, 2012-12-31 How does the practice of archaeology benefit from faunal analysis Michael Glassow and Terry Joslin s Exploring Methods of Faunal Analysis Insights from California Archaeology addresses this question Contributors to this volume demonstrate how faunal remains can be used to elucidate subsistence settlement technological systems economic exchange social organization adaptation to variability in resource distribution and abundance and the impacts of historic land use The sheer prevalence of faunal remains in California archaeological sites means that most archaeologists working in the state inevitably must give these resources their close attention and yet methodological challenges remain The chapters in this thoughtfully edited volume tackle these challenges providing strategies for identifying and mitigating sample bias and recommending quantitative techniques borrowed from a variety of disciplines The volume also presents examples that illustrate the use of faunal data to test hypotheses derived from microeconomic theory the applicability of bone and shell chemistry to faunal analysis and the relevance of faunal data to addressing issues in biology Handbook of Landscape Archaeology Bruno David, Julian Thomas, 2016-06-03 Over the past three decades landscape has become an umbrella term to describe many different strands of archaeology From the processualist study of settlement patterns to the phenomenologist s experience of the natural world from human impact on past environments to the environment s impact on human thought action and interaction the term has been used In this volume for the first time over 80 archaeologists from three continents attempt a comprehensive definition of the ideas and practices of landscape archaeology covering the theoretical and the practical the research and conservation and encasing the term in a global framework As a basic reference volume for landscape archaeology this volume will be the benchmark for decades to come All royalties on this Handbook are donated to the World Archaeological Congress How Food Made History B. Political Order and Inequality Carles Boix, 2015-02-16 The fundamental question of political theory one that precedes all other questions about the nature of political life is why there is a state at all Is human cooperation feasible without a political authority enforcing it Or do we need a state to live together This problem then opens up two further questions If a state is necessary to establish order how does it come into place And when it does what are the consequences for the political status and economic welfare of its citizens Combining ethnographical material historical cases and statistical analysis this book describes the foundations of stateless societies why and how states emerge and the basis of political obligation As a result of this inquiry it explains the economic and political roots of inequality describes the causes of the stagnation of the preindustrial world and explores what led to the West's prosperity of the past two centuries
