Cases on Error Analysis in Foreign Language Technical Writing Lebedeva, Nadezhda Anatolievna, 2023-07-21. There is a clear tendency to consider the errors committed by learners in the process of learning a foreign language not as a negative aspect but as a natural process in the development of their language skills. In the past, teachers and researchers pondered these errors as something unfavorable, something to prevent from occurring at all costs. In order to regulate this appearance of errors, many researchers in the field of foreign language technical teaching have started to study and track the errors made by these students. Knowing the most common types of errors is an important and necessary step to inform teachers about where to direct their efforts regarding the most problematic areas students face while producing their technical writing assignments in a foreign language. **Cases on Error Analysis in Foreign Language Technical Writing** provides relevant theoretical foundations and the latest empirical research findings in the area of error analysis in foreign language technical writing. This book also summarizes the experience of teaching a foreign language for professional purposes in various fields of higher education. Covering topics such as error analysis, lexical skills, and writing outputs, this casebook is an essential resource for preservice teachers, educators, administrators, librarians, researchers, and academicians.

Lecture Notes on Applied Linguistics Ali Alhaj, 2015-12-01. Linguistics can be defined as the scientific study of a language, any language, by virtue of description and

analysis a major concept introduced by the Swiss linguist Ferdinand de Saussure 1857 1913 one of the pioneering early exponents of modern linguistics According to him the one and the only correct subject of linguistics is language which involves in itself for the sake of itself Al Saaran 1962 p 49 Some enormous attempts were made by Dr Mohamoud Al Sa aran to explain and interpret F D Saussure s working words on linguistics in this context as he points out The researcher of a language studies a language for its sake Also she he studies it as it appears without any oscillation The researcher has no right to confine herself himself to explaining and investigating only one aspect of a language by reason of her his highly commendation and to abandon the other attempts to explore the other aspect of language recklessly and wildly because of her his disapproval and disapprobation as well as her his frivolity of it Furthermore she he acts according to her his own desire or for any other reason Ibid p 51 On his turn Al Sa aran also explains the working words of F D Saussure for its own sake by saying that the researcher studies language objectively in order to explore and probe its reality She he does not aim at achieving for instance either pedagogical objectives or any working goals Fittingly the researcher does not study language in order to enhance and to correct one of its aspects or to make any other amendments on it But she he has to confine herself himself to describing and analyzing language objectively Ibid p 51
