**EMF Effects from Power Sources and Electrosmog** William J. Rea, 2018-11-05 The field of electromagnetic sensitivity is the new epidemic of the 21st century and can cause disease of the automatic nerve system in any part of the body This is as a result of chemical sensitivity in which over 80 000 chemicals are involved resulting in innumerable combinations A cursory understanding of the combinations can help clinicians partially understand the associated problems and thus help in the diagnosis and treatment of electromagnetic sensitivities But a basic understanding of environmentally induced illness and healing must first be understood by the clinicians before diseases

occur such as cardiac arrhythmia muscle spasms and nerve pain Key Features Describes how an understanding of the vast combinations of electrical and chemical sensitivities will help in the diagnosis and treatment of electromagnetic sensitivities Reveals the complexity and multi faceted presentation often seen in chemical sensitivity and chronic degenerative disease cases Provides information backed up by rigorous scientific data including hundreds of tables and figures as online resources Features a Dedication to Robert Becker MD an orthopedic surgeon who was one of the first clinicians to recognize the significance of EMF in medicine and surgery and also to his assistant Andrew Marino PhD who helped develop the basic science of orthopedic electromagnet healing The Invisible Rainbow Arthur Firstenberg,2020-02-28 The most misunderstood force driving health and disease The story of the invention and use of electricity has often been told before but never from an environmental point of view The assumption of safety and the conviction that electricity has nothing to do with life are by now so entrenched in the human psyche that new research and testimony by those who are being injured are not enough to change the course that society has set Two increasingly isolated worlds that inhabited by the majority who embrace new electrical technology without question and that inhabited by a growing minority who are fighting for survival in an electrically polluted environment no longer even speak the same language In The Invisible Rainbow Arthur Firstenberg bridges the two worlds In a story that is rigorously scientific yet easy to read he provides a surprising answer to the question How can electricity be suddenly harmful today when it was safe for centuries **Overpowered** Martin Blank, PhD,2014-09-16 Keys wallet cell phone ready to go Cell phones have become ubiquitous fixtures of twenty first century life suctioned to our ears and stuck in our pockets Yet we ve all heard whispers that these essential little devices give you brain cancer Many of us are left wondering as Maureen Dowd recently asked in the New York Times Are cells the new cigarettes **Overpowered** brings readers in accessible and fascinating prose through the science indicating biological effects resulting from low non thermal levels of non ionizing electromagnetic radiation levels considered safe by regulatory agencies coming not only from cell phones but many other devices we use in our homes and offices every day Dr Blank arms us with the information we need to lobby government and industry to keep ourselves and our families safe *Toxin Nation* Marie D.
