*The Lifestyle Puzzle* Henrick Vejlgaard, 2010-07-27 The author describes the emergence of a radically new type of tribalism one based not on the fixity of age old ethnic tradition but on the fluidity of diverse lifestyle choices being made by contemporary individuals Stephen Bertman PhD author of *Hyperculture* and *Cultural Amnesia* American society is more diverse than ever A country that used to think of itself as the great melting pot may soon be calling itself the great lifestyle buffet With increasing affluence more and more Americans are in a position to choose whatever lifestyle most appeals to them The result is that the national landscape has become an intricate mosaic of varying styles self expressions and ways of life Even the distinction between majority and minority is starting to blur Is there any pattern to this ever shifting kaleidoscope of identities Social scientist and communications specialist Henrik Vejlgaard puts the pieces together into a coherent picture in this fascinating study of American diversity Applying the astute pattern recognition skills that he demonstrated in his previous book the critically acclaimed *Anatomy of a Trend* Vejlgaard examines how we transform our identities into practical everyday living into our lifestyle Going beyond the usual markers of identity race ethnicity religion political affiliation income level etc he focuses on modes of communicating group identity nonverbally through consumer choices clothing fashions personal color choices adornments accessories logos signs and symbols Curiously what emerges from his analysis is a pattern as ancient as human culture itself a new form of tribalism He foresees this trend continuing so that by the end of the twenty first century there will be less identification with nation states and ethnic groups and more small group identification As globalization and mass communication continue to link us together we may all become so used to diversity that the idea of conflict based on national identity distinctions may seem antiquated A book of remarkable insights *The Lifestyle Puzzle* will have great appeal to readers interested in popular culture social change and consumer

**Curious Travellers** Mary-Ann Constantine, 2024-10-23 *Curious Travellers Writing the Welsh Tour 1760-1820* provides the first extensive literary study of British tours of Wales in the Romantic period c. 1760-1820. It examines writers' responses to Welsh landscapes and communities at a time of drastic economic, environmental, and political change. Opening with an overview of Welsh tours up to the early 1700s, Mary Ann Constantine shows how the intensely intertextual nature of the genre imbued particular sites and locations with meaning. She next draws upon a range of manuscript and published sources to trace a circular tour of the country, unpicking moments of cultural entanglement and revealing how travel writing shaped understanding of Wales and Welshness within the wider British polity. Wales became a popular destination for visitors following the publication of Thomas Pennant's *Tours in Wales* in the late 1770s. Hundreds of travel accounts from the period are extant, yet few, particularly those by women, have been studied in depth. Wales proves in these narratives as much a place of disturbance as a picturesque haven, a potent mixture of medieval past and industrial present exposed down its west coast to the threat of invasion during the Napoleonic Wars. From castles to copper mines, Constantine explores the full potential of tour writing as an idiosyncratic genre at the interface of literature and history, arguing for its vital importance to broader cultural and environmental studies.
