

The background of the cover is an abstract, painterly composition. It features a palette of warm colors, including deep reds, oranges, and yellows, with some cooler greenish-yellow tones on the left side. The texture is soft and blended, suggesting a watercolor or oil painting style. In the center, there is a faint, ethereal figure of a person, possibly a woman, with long hair, rendered in a light, almost transparent manner that blends into the background. The overall mood is contemplative and artistic.

*Cognitive Disability Aesthetics* Benjamin Fraser, 2018-01-01 Cognitive Disability Aesthetics explores the invisibility of cognitive disability in theoretical historical social and cultural contexts Benjamin Fraser's cutting edge research and analysis signals a second wave in disability studies that prioritizes cognition Fraser expands upon previous research into physical disability representations and focuses on those

disabilities that tend to be least visible in society autism Down syndrome Alzheimer's disease schizophrenia Moving beyond established literary approaches analyzing prose representations of disability the book explores how iconic and indexical modes of signification operate in visual texts Taking on cognitive disability representations in a range of visual media painting cinema and graphic novels Fraser showcases the value of returning to impairment discourse Cognitive Disability Aesthetics successfully reconfigures disability studies in the humanities and exposes the chasm that exists between Anglophone disability studies and disability studies in the Hispanic world *Autism in a Decentered World* Alice Wexler, 2016-01-29 Autistic people are empirically and scientifically generalized as living in a fragmented alternate reality without a coherent continuous self In Part I this book presents recent neuropsychological research and its implications for existing theories of autism selfhood and identity challenging common assumptions about the formation and structure of the autistic self and autism's relationship to neurotypicality Through several case studies in Part II the book explores the ways in which artists diagnosed with autism have constructed their identities through participation within art communities and cultures and how the concept of self as story can be utilized to better understand the neurological differences between autism and typical cognition This book will be of particular interest to researchers and scholars within the fields of Disability Studies Art Education and Art Therapy *A Cultural History of Disability in the Modern Age* David T. Bible's most striking images of disability. Nonetheless, interpreters tend to focus on legal material rather than narratives when studying disability in the Hebrew Bible. Often they neglect the David Story's complex use of disability. They overlook its use of disability imagery as open to critical interpretation because its stereotypical meanings may seem so commonplace and transparent. Yet recent work in the burgeoning field of disability studies presents disability as a complicated motif that demands more critical engagement than it typically receives. Informed by exciting developments in the field, it argues that the David Story employs disability imagery as a subtle mode of narrating and organizing various ideological positions regarding national identity.

**Disability Research Today** Tom Shakespeare, 2015-03-05 Grouped around four central themes: illness and impairment, disabling processes, care and control, and communication and representations, this collection offers a fresh perspective on disability research, showing how theory and data can be brought together in new and exciting ways. *Disability Research Today* starts by showing how engaging with issues around illness and impairment is vital to a multidisciplinary understanding of disability as a social process. The second section explores factors that affect disabled people, such as homelessness, violence, and unemployment. The third section turns to social care and how disabled people are prevented from living with independence and dignity. Finally, the last section examines how different imagery and technology impacts our understandings of disability and deafness. Showcasing empirical work from a range of countries including Japan, Norway, Italy, Australia, India, the UK, Turkey, Finland, and Iceland, this collection shows how disability studies can be simultaneously sophisticated, accessible, and policy relevant. *Disability Research Today* is suitable for students and researchers in disability studies, sociology, social policy, social work, nursing, and health studies.

**Disability, Deformity, and Disease in the Grimms' Fairy Tales** Ann Schmiesing, 2014-11-03 Readers interested in fairy tales studies and disability studies will appreciate this careful reading of the Grimms' tales.

*Old Age in the Middle Ages and the Renaissance* Albrecht Classen, 2012-02-14 After an extensive introduction that takes stock of the relevant research literature on Old Age in the Middle Ages and the early modern age, the contributors discuss the phenomenon of old age in many different fields of late antique, medieval, and early modern literature, history, and art history. Both *Beowulf* and the *Hildebrandslied*, both Wolfram von Eschenbach's *Parzival* and *Titurël*, both the figure of Merlin and the trans-European tradition of *Perceval*, *Peredur*, *Parzival*, then the figure of the *vetula* in a variety of medieval French, English, and Spanish texts, and of the Old Man in *The Stricker's Daniel*, both the treatment of old age in Langland's *Piers the Plowman* and in Jean Gerson's sermons are dealt with. Other aspects involve late antique epistolary literature, early modern French farce, in light of Disability Studies, the social role of old, impotent men in sixteenth and seventeenth-century Netherlandish paintings, and the scientific discourse of old age and health since the 1500s. The discourse of Old Age proves to have been of central importance throughout the ages, so the critical examination of the issues involved sheds intriguing light on the cultural history from late antiquity to the seventeenth century.

**Disability & the Politics of Education** Susan Lynn Gabel, Scot Danforth, 2008 *Disability and the Politics of Education*

An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education. For nearly two decades, global attention has been given to education as a human right through global initiatives such as Education for All (EFA) and the Salamanca Statement. Yet according to UNESCO, reaching the goals of EFA remains one of the most daunting challenges facing the global community. Today, millions of the world's disabled children cannot obtain a basic childhood education, particularly in countries with limited resources. Even in the wealthiest countries, many disabled children and youth are educationally segregated from the nondisabled, particularly if they are labeled with significant cognitive impairment. International agencies such as the United Nations and the World Bank have generated funds for educational development, but unfortunately, these funds are administered with the assumption that the West is best, thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness. This McDonaldization of education reproduces the labeling, resource allocation, and social dynamics long criticized in disability studies. The authors in this volume explore these subjects and other complexities of disability and the politics of education. In doing so, they demonstrate the importance and usefulness of international perspectives and comparative approaches.

**Retrieving the Crip Outsider** Someshwar Sati, 2024-03-30. Why are abnormal figures at the heart of literary canon and what do they tell us about the society that writes and circulates these stories? This book studies the constitution of disability and discusses concepts of corporeal difference that are socio-historically rooted in the Indian cultural milieu. The volume aims at looking at the central issue of the various aspects of disability representation, the impact of these representations on the materially embodied experience of disablement, the political imperatives shaping the narratives of corporeal difference, and the influences of highly particularised local cultural context on the constitution of epistemic and discursive notions of corporeality. The volume follows three routes of inquiry: How do we find disability in texts or what are disability texts? How do we read concepts historically using literary and cultural texts, and what would a similar study of the Indian context reveal? How do we study culturally distinct ways of narrating bodyminds? These questions will be answered through a discussion of representation histories of the abnormal informed by histories of disease conditions and its representations with the aim of developing ways of thinking and talking about concepts of corporeal difference that are socio-culturally and socio-historically located away from the western context and to explore the intersections between gender, caste, religion, sexuality, class, and disability.

**Disability and Art History** Ann Millett-Gallant, Elizabeth Howie, 2016-10-26. This is the first book of its kind to feature interdisciplinary art history and disability studies scholarship. Art historians have traditionally written about images of figures with impairments and artworks by disabled artists without integrating disability studies scholarship, while many disability studies scholars discuss works of art but do not necessarily incorporate art historical research and methodology. The chapters in this volume emphasize a shift away from the medical model of disability that is often scrutinized in art history by considering the social model and representations of disabled figures from a range of

styles and periods mostly from the twentieth century Topics addressed include visible versus invisible impairments scientific anthropological and vernacular images of disability and the theories and implications of looking staring versus gazing They also explore ways in which art responds to envisions and at times stereotypes and pathologizes disability The insights offered in this book contextualize understanding of disability historically as well as in terms of medicine literature and visual culture
