

# SOCIAL CONSTRUCTION OF DISABILITY

## DEFINITION

The social constructionist approach to disability refers to idea that people's experiences of disability are shaped by social, historical and cultural contexts.

This view places greater burden on society to ensure inclusivity than the 'medical model' of disability.

## EXAMPLE

A learner with dyslexia may have once been socially constructed as unintelligent. Today, we realize that people with dyslexia are not more or less intelligent than others. They just need teachers to use non-text-based teaching strategies. Thus, we've changed our social construction of dyslexia thanks to better knowledge of the disability.
