A Guide to Classics and Cognitive Studies Anna A. Novokhatko, 2024-12-02 Readers of this book receive an overview of the main perspectives and research of recent decades in the fruitful collaboration between Classics and Cognitive studies It is intended as a stocktaking of various branches of Classics such as literary criticism and poetics linguistics ancient history and archaeology Four major research areas or clusters have been chosen for the presentation of the chapters Chapter one discusses recent studies of cognitive materiality and material agency in relation to the human mind chapter two the so called spatial turn and cognition and the perception of space in place in relation to antiquity chapter three imagination and vision and cognitive approaches to seeing while chapter four considers experience and experientiality and the sensory turn as applied to ancient sources Finally the fifth chapter is a special case and a different medium it consists of three interviews with three well known pioneers of the study of emotions in antiquity David Konstan Angelos Chaniotis and Douglas Cairns who in various direct and indirect ways have greatly influenced the interplay and dialogue between classical studies and cognitive approaches in recent decades This book takes stock of a rapidly developing and highly controversial field that is currently in full bloom Mouton Classics Mouton Publishers, 2002 Mouton proudly presents this collection of articles considered to be representative of author achievements over the past quarter century of its publishing history A selection of course can do little more than make the readers wish for more it is hoped that these volumes will do just that The book contains essays on Phonology Morphology Formal Syntax Functional Linguistics Historical Linguistics Language and Cognition Language Acquisition Discourse and Text Sociology of Language Semiotics The Routledge Handbook of Classics and Cognitive Theory Peter Meineck, William Michael Short, Jennifer Devereaux, 2018-11-21 The Routledge Handbook of Classics and Cognitive Theory is an interdisciplinary volume that examines the application of cognitive theory to the study of the classical world across several interrelated areas including linguistics literary theory social practices performance artificial intelligence and archaeology With contributions from a diverse group of international scholars working in this exciting new area the volume explores the processes of the mind drawing from research in psychology philosophy neuroscience and anthropology and interrogates the implications of these new approaches for the study of the ancient world Topics covered in this wide ranging collection include cognitive linguistics applied to Homeric and early Greek texts Roman cultural semantics linguistic embodiment in Latin literature group identities in Greek lyric cognitive dissonance in historiography kinesthetic empathy in Sappho artificial intelligence in Hesiod and Greek drama the enactivism of Roman statues and memory and art in the Roman Empire This ground breaking work is the first to organize the field allowing both scholars and students access to the methodologies bibliographies and techniques of the cognitive sciences and how they have been applied to classics **The Function of the Tautological Infinitive in Classical Biblical Hebrew** Yoo-Ki Kim, 2018-08-14 One of the intriguing and insufficiently understood features of Biblical Hebrew is the use of an infinitive form

alongside a finite verb of the same root The function of this construction has generally been understood as serving to provide some kind of emphasis However neither translations nor grammars are consistently able to explain what is being emphasized by the use of this construction This volume which is a revision of the author's Ph D dissertation at the Johns Hopkins University 2006 examines the tautological infinitive construction in Classical Biblical Hebrew that is the Hebrew written during the First Temple Period more or less equivalent to the material in Genesis 2 Kings excluding P in order to give a coherent and consistent explanation of its function In a final chapter Kim discusses the use of the tautological infinitive in Classical Biblical Hebrew in relation to its use in non Classical biblical texts and Semitic languages in order to set it in a broader context

The Classical Tibetan Language Stephan V. Beyer, 1992-01-01 Among Asian languages Tibetan is second only to Chinese in the depth of its historical record with texts dating back as far as the eighth and ninth centuries written in an alphabetic script that preserves the contemporaneous phonological features of the language The Classical Tibetan Language is the first comprehensive description of the Tibetan language and is distinctive in that it treats the classical Tibetan language on its own terms rather than by means of descriptive categories appropriate to other languages as has traditionally been the case Beyer presents the language as a medium of literary expression with great range power subtlety and humor not as an abstract object He also deals comprehensively with a wide variety of linguistic phenomena as they are actually encountered in the classical texts with numerous examples of idioms common locutions translation devices neologisms and dialectal variations

Orality and Performance in Classical Attic Prose Alessandro Vatri, 2017-02-16 This study discusses the question of whether there is a linguistic difference between classical Attic prose texts intended for public oral delivery and those intended for written circulation and private performance Identifying such a difference which exclusively reflects these disparities in modes of reception has proven to be a difficult challenge for both literary scholars and cultural historians of the ancient world with answers not always satisfactory from a methodological and an analytical point of view The legitimacy of the question is first addressed through a definition of what such slippery notions as orality and oral

performance mean in the context of classical Athens reconstruction of the situations in which the extant prose texts were meant to be received and an explanation of the grounds on which we may expect linguistic features of the texts to be related to such situations The idea that texts conceived for public delivery needed to be as clear as possible is substantiated by available cultural historical and anthropological facts however these do not imply that the opposite was required of texts conceived for private reception In establishing a rigorous methodology for the reconstruction of the native perception of clarity in the original contexts of textual reception this study offers a novel approach to assessing orality in classical Greek prose through examination of linguistic and grammatical features of style It builds upon the theoretical insights and current experimental findings of modern psycholinguistics providing scholars with a new key to the minds of ancient writers and audiences

Varieties of Post-classical and Byzantine Greek Klaas Bentein, Mark Janse, 2020-11-09 Linguistic varieties such as female speech foreigner talk and colloquial language have not gone unnoticed when it comes to Classical Greek but little is known about later periods of the Greek language In this collective volume leading experts in the field outline some of the most important varieties of Post classical and Byzantine Greek basing themselves on a broad range of literary and documentary sources and advancing a number of innovative methodologies Close attention is paid to the linguistic features that characterize these varieties with in depth discussions of lexical morpho syntactic orthographic and metrical variation as well as the interrelationship between these different types of variation The volume thus offers valuable insights into the nature of Post classical and Byzantine Greek laying the foundation for future studies of linguistic variation in these later stages of the language while at the same time providing a point of comparison for Classical Greek scholarship

Classical Philology and Linguistics Georgios K. Giannakis, Panagiotis Filos, Emilio Crespo Güemes, Jesús de la Villa, 2023-10-24 There is a long standing debate over the relation of historical linguistics and classical philology especially within the purview of the renewed interest in it during the last decades and the recent trends that characterize philological and linguistic studies Ever since its appearance in the nineteenth century the history of this debate testifies to a turbulent coexistence and fertile collaboration of the two disciplines but at times also moving along centrifugal paths The essays in this volume address this debate and cover various aspects of linguistic and philological research of Greek and Latin moving in the middle ground where language linguistics and philology crosscut and cross fertilize each other highlighting the application of linguistic theory to the study of classical texts and drawing on fields such as syntactic theory and pragmatics historical semantics and the lexicon reconstruction and etymology dialectology editorial practices the use of corpora and other interdisciplinary approaches that function as hinges between philology and linguistics

Juvenal and the Satiric Genre Frederick Jones, 2012-12-20 While claiming to stand outside literature altogether Roman verse satire was the most aggressively literary of Roman genres Juvenal s particularly so In the opening lines of the corpus his performance creates an arena in which the

various genres of his Graeco Roman cultural inheritance jostle to be heard and are suppressed by his own generic identity Juvenal and the Satiric Genre considers the fluid nature of the generic field and how Juvenal comes out of and fits into it Specifically it measures his use of names his ambiguous and sometimes hostile relations with other genres especially the queen of genres epic against his inherited and stated aim of criticizing malefactors by name and considers how the aspect of performance impinges on his multi faceted satiric voice This challenging series considers Greek and Roman literature primarily in relation to genre and theme It also aims to place writer and original addressee in their social context The series will appeal to both scholar and student and to anyone interested in our classical inheritance *Text Linguistics and*

Classical Studies Mauro Giuffrè, 2016-11-17 The work represents a significant scientific advancement on text linguistics from three different viewpoints The first chapter provides an overview of the history of text linguistics from a broader perspective than usual offering a complete reference framework The second chapter presents the procedural approach to the study of text linguistics in a concise way including a critical comparison with other perspectives The third chapter constructs a very unusual bridge between theoretical linguistics and classical studies in that it takes a literary text in Latin from the early imperial period as its case study This combination is rare as theoretical linguists are usually oriented to modern languages and classicists are not generally inclined to the study of formal linguistics It also offers an interesting perspective that intersects the studies of general linguistics and glottology which makes this volume of interest to general linguists classicists philologists and literary critics alike **Emotions and Narrative in Ancient Literature and Beyond**, 2022-04-25
